European Commission Coordinator on Combating
Antisemitism and Fostering Jewish Life

Dear reader,

European Jews and Jewish communities have been contributing to the social, political, economic, scientific and cultural development of Europe for over two millennia and are an inextricable part of Europe's identity. At the same time, antisemitism has been present in Europe for centuries, manifesting in the form of expulsions, persecutions and pogroms, which culminated in the Holocaust. An indelible stain on European history, which erased Jewish life and heritage in many parts of the continent.

But antisemitism did not end with the Holocaust. The reality is that antisemitism is worryingly on the rise again, in Europe and beyond. In the past decade we have seen lethal attacks in the EU on Jewish schools, synagogues, museums and other sites. The 'Annual overview on antisemitic incidents 2011-2021' published by the European Union Agency for Funda-

mental Rights (FRA) shows that thousands of officially registered incidents take place each year in the EU, and due to underreporting this is only the tip of the iceberg. The internet has become the entry door bringing hatred, hate speech, prejudices and antisemitism into our living rooms. During the covid-19 pandemic, we have even witnessed the resurgence of century-old antisemitic conspiracy myths repackaged in new forms with Jewish communities unjustifiably being blamed for creating the virus and for developing vaccines to make a profit. Hate is spreading faster and faster, even in countries like the Czech Republic, where there are thankfully very few physical attacks on both people and Jewish sites. Nevertheless, the number of recorded manifestations of antisemitism is also increasing in the Czech Republic, especially online. This is extremely concerning, because online hatred leads to radicalisation, and often begins with conspiracy myths.

Antisemitism and other forms of discrimination are incompatible with the European values and the European Union is determined to put an end to it. According to the FRA survey on experiences and perceptions of antisemitism, 38% of Jewish people in the EU have considered emigrating because they did not feel safe as Jews in the country where they live. Therefore, in October 2021, the European Commission adopted its first-ever EU strategy on combating antisemitism and fostering Jewish life. This strategy is the EU's commitment to a future for Jewish life in Europe and beyond.

As part of the EU Strategy the Commission supports civil society organisations to combat antisemitic hate speech, hate crime and discrimination through the Citizens, Equality, Rights and Values (CERV) programme. Reliable and comparable data on antisemitic incidents are crucial to assess the spread of antisemitism in Europe and to tackle it effectively. The Manifestations of Antisemitism in Czech Republic (MANTIC) project is

co-funded by the CERV programme, and contributes to improving the data and registering of antisemitic incidents. The project is implemented by a consortium that includes the Jewish Community of Prague, the Jewish Museum in Prague and the Federation of Jewish Communities in the Czech Republic, and the present Annual Report on Manifestations of Antisemitism in the Czech Republic 2022 is a key output of it.

We are thankful for the consortium's commitment to combat antisemitism and the contribution its work makes to gain a better understanding of contemporary antisemitism in the EU. The project and this annual report are important to point out the dangers of antisemitism and to help tackling it to ensure an EU free from antisemitism and any form of discrimination. An open, inclusive and equal EU for all, in which Jewish communities can flourish.

1 | SUMMARY OF THE SITUATION IN 2022

In 2022, the Federation of Jewish Communities in the Czech Republic (FJC) recorded 2,277 antisemitic incidents. The constant trend of leapfrog growth of antisemitic manifestations which could be clearly seen in the previous periods monitored, thus continued also last year. Compared to year 2021, in which 1,128 antisemitic incidents were recorded, this trend can be labelled as dramatic.

Despite the fact that the number of recorded incidents grew year-on-year by more than 100%, like in the previous years, we can affirm that cases of violence motivated by antisemitism are recorded in the Czech Republic only exceptionally. In 2022, no one reported any physical assault to the FJC. But, in this context, we shall recall again that victims or witnesses of manifestations of prejudicial hatred motivated by antisemitism often decide not to report these acts to relevant authorities, or for various reasons do not wish to give the details of their negative experience. Therefore, although the FJC has analysed only a few violent acts targeted against the Jews, it is likely that the actual number of similar incidents is annually much higher.

Source: Federation of Jewish Communities in the Czech Republic, February 2023

In the category of attacks on Jewish property with antisemitic texts, depictions, symbols, etc., two incidents were recorded in 2022, and we can say that the long-term trend in this area has been more or less stable. In 2018, 2019 and 2021, three attacks on Jewish property were recorded per each year, in 2020, it was only one incident of this kind.

Nine incidents were put into the category of physical aggression threats, harassment or insults of a specific person due to their real or presumed Jewish faith in 2022. There were only a few manifestations of antisemitism, but as compared to year 2021, the increase has almost doubled.

Manifestations of prejudicial hatred always correlate with the general atmosphere in society, which is shaped by local events as well as global geopolitical and economic factors. Last year, the content, form and amount of antisemitic narratives was thus influenced beside the fading away covid-19 pandemic by the Russian aggression against Ukraine, including the related economic, energetic and raw materials' crisis, and last but not least by the persisting tension in the Middle-East in the context of the Israeli-Palestinian conflict.

In accordance with the trends of the past few years, 97.1% of all manifestations of antisemitism originated in the virtual environment. Apart from articles, graphic materials, anonymous comments and discussion posts, it concerned especially social networks, where over 74% of all online incidents were recorded. In the long-term perspective, it is the social media networks which are the dominant host platform of antisemitism and hatred production and dissemination in general, and to a significant extent contribute to the growing polarisation in society. From the analysis of the attacks of motivated prejudicial hatred recorded so far, it clearly follows that the internet and virtual communication platforms in particular play the dominant role in the radicalisation process of individuals and groups, and at the same time facilitate the planning and preparation of violent crimes which the attackers are about to perform. This observation was confirmed by an attack with a firearm which took place in the proximity of Tepláreň bar in Bratislava on 12 October 2022 and which had two victims. In his own words, the perpetrator had prepared for the act systematically and for a long time and had shared a great amount of hate and conspiracy comments on social networks. Although no comparable incident was recorded in CR in 2022, the global context of persisting concerns about radicalisation in the online environment remains high on the agenda.

The content of the recorded antisemitic incidents has not gone through any essential change in 2022 as compared to the preceding years. Again, the most prevalent were mendacious, demonizing, vulgar and stereotypical claims and conspiracy theories with antisemitic subtext. A large scale of antisemitic invectives as part of isolated incidents as well as long-term activity of specific organised platforms, groups and individuals could be observed.

More than one third of the total number of incidents, which the FJC analysed in 2022, originated in the ideological positions of the far right. In the second third of antisemitic incidents, the ideological background could not be clearly determined because the authors or disseminators of these incidents do not declare any extreme political attitudes. But from the ideological point of view, the growth of the total volume of recorded data most clearly showed in the case of the disinformation platforms. Despite the fact that the previous four periods monitored saw a steady increase in this area, in 2022, an over 200% leapfrog increase was documented. While in 2021, 14.4% of all registered incidents originated from the disinformation platforms, in 2022, these platforms published 24.5% of all antisemitic incidents documented. Due to the increasing disinformation media activity and popularity and to massive acceleration of conspiracy content dissemination, it is not a surprising, but an extremely worrying finding. Disinformation movements contribute to society polarisation and have the potential to act and destroy the fundamental democratic constitutional principles.

Despite the severity of some conclusions, we can, again, affirm that the Czech Republic is a safe country for the Jewish community. Manifestations of antisemitism ventilated in the internet environment set a trend in the long-term and on the global scale, though, which definitely deserves increased attention.

2 | INTRODUCTION

2.1 | THE PURPOSE OF THE ANNUAL REPORT ON MANIFESTATIONS OF ANTISEMITISM IN 2022

The Annual Report on Manifestations of Antisemitism in the Czech Republic of 2022 (AR) has been drafted by the FJC for the internal needs of the Jewish communities in the Czech Republic (CR) and also for the needs of other institutions processing data on antisemitism. The aim of the Report is to provide, as far as the scope of the acquired details allows, a comprehensive overview of the manifestations of antisemitism, trends and social climate in relation to the manifestations of antisemitism.

2.2 | METHOD AND TERMINOLOGY

The principal part of the Annual Report contains information about antisemitic incidents recorded by the FJC in 2022. According to the FJC, an antisemitic incident is an act or manifestation that meets the working definition of antisemitism (see chapter 2.3), bearing in mind that antisemitic incidents may take various forms, from attacks on property, physical and verbal assault and threatening to posts on the internet and social networks. The gathered data were provided by victims of antisemitic incidents, Czech Jewish organisations and communities as well as by the general public, the

CR Police and open sources, including both mainstream media and the web sites and social networks of monitored organisations. As FJC draws exclusively on open sources and the availability of relevant data depends, amongst other things, on the willingness, ability and possibilities of the victims and witnesses to actually report manifestations of antisemitism, the statistical overview of incidents published in the Annual Report does not reflect the total number of incidents which occurred in the past year.

The AR contains only general lists of antisemitic incidents and texts recorded by the FJC in 2022. Due to personal data protection, the names and profile photographs used in the posts in discussions and on social networks presented as illustrative examples have been intentionally blurred.

Also, to protect the affected individuals and witnesses and to ensure their safety, targeted incidents do not contain details allowing their identification. The AR retains full identification details only in the case of personally targeted attacks revealed by publicly exposed persons who had been the target of such attacks themselves. Samples and quotations from individual incidents are presented verbatim, including typographical errors and stylistic and grammatical mistakes.

All URL sources referred to in the AR were accessible on 30 January 2023.

In its further analysis, the AR divides antisemitic incidents into categories and classifies them according to (1) type, (2) ideology, (3) content, (4) target, and (5) medium through which the individual incidents took place. Since the AR applies certain concepts which have not yet been defined in Czech law and are to a certain extent ambiguous, the categorisation of incidents applies, besides the working definition of antisemitism, also the

working definitions of the following concepts “extremism”,¹ “disinformation” and “propaganda” as used by the Ministry of the Interior of the Czech Republic (MI CR).²

In its evaluation of the sociopolitical development in CR in the past year, the AR draws on documents of government institutions which were made public, especially the semiannual report of MI CR.³ In its summary of the European and global context, it draws, *inter alia*, on details provided by the British Community Security Trust (CST)⁴ and organisations such as the Jewish Agency (JA),⁵ World Jewish Congress (WJC),⁶ Anti-Defamation League (ADL),⁷ the Coordination Forum for Countering Antisemitism (CFCA).⁸

2.3 | WORKING DEFINITION OF ANTISEMITISM

This report abides by the working definition of antisemitism applied by the International Holocaust Remembrance Alliance (IHRA).⁹ On 25 January 2019,¹⁰ the Chamber of Deputies of the Parliament of CR adopted a resolution acknowledging this definition; the Senate of the Parliament of CR did so on 30 January 2019.¹¹

The objective of the working definition of antisemitism is also to provide a practical guide to the identification of incidents and collection of data; it also contains specific illustrative examples of manifestations of antisemitism.

Antisemitism is a certain perception of Jews, which may be expressed as hatred toward Jews. Rhetorical and physical manifestations of antisemitism are directed toward Jewish or non-Jewish individuals and/or their property, toward Jewish community institutions and religious facilities.

To guide IHRA in its work, the following examples may serve as illustrations:

Manifestations might include the targeting of the state of Israel, conceived as a Jewish collectivity. However, criticism of Israel similar to that leveled against any other country cannot be regarded as antisemitic. Antisemitism frequently charges Jews with conspiring to harm humanity, and it is often used to blame Jews for “why things go wrong.” It is expressed in speech, writing, visual forms and action, and employs sinister stereotypes and negative character traits.

Contemporary examples of antisemitism in public life, the media, schools, the workplace, and in the religious sphere could, taking into account the overall context, include, but are not limited to:

- *Calling for, aiding, or justifying the killing or harming of Jews in the name of a radical ideology or an extremist view of religion.*
- *Making mendacious, dehumanizing, demonizing, or stereotypical allegations about Jews as such or the power of Jews as collective – such as, especially but not exclusively, the myth about a world Jewish conspiracy or of Jews controlling the media, economy, government or other societal institutions.*

- *Accusing Jews as a people of being responsible for real or imagined wrongdoing committed by a single Jewish person or group, or even for acts committed by non-Jews.*
- *Denying the fact, scope, mechanisms (e.g. gas chambers) or intentionality of the genocide of the Jewish people at the hands of National Socialist Germany and its supporters and accomplices during World War II (the Holocaust).*
- *Accusing the Jews as a people, or Israel as a state, of inventing or exaggerating the Holocaust.*
- *Accusing Jewish citizens of being more loyal to Israel, or to the alleged priorities of Jews worldwide, than to the interests of their own nations.*
- *Denying the Jewish people their right to self-determination, e.g., by claiming that the existence of a State of Israel is a racist endeavor.*
- *Applying double standards by requiring of it a behavior not expected or demanded of any other democratic nation.*
- *Using the symbols and images associated with classic antisemitism (e.g., claims of Jews killing Jesus or blood libel) to characterize Israel or Israelis.*
- *Drawing comparisons of contemporary Israeli policy to that of the Nazis.*
- *Holding Jews collectively responsible for actions of the state of Israel.*

Antisemitic acts are criminal when they are so defined by law (for example, denial of the Holocaust or distribution of antisemitic materials in some countries). Criminal acts are antisemitic when the targets of attacks, whether they are people or property – such as buildings, schools, places of worship and cemeteries – are selected because they are, or are perceived to be, Jewish or linked to Jews. Antisemitic discrimination is the denial to Jews of opportunities or services available to others and is illegal in many countries.”¹²

¹² The Czech official translation of the working definition of antisemitism: <https://www.psp.cz/sqw/text/text2.sqw?idd=154253&fbclid=IwAR31Kha856GxRCyg0de4grIWVKIJAY8-tj01esQXol4XJ73wnCa7DrPPD5o>

2.4 | 3D TEST

The AR also uses the concept of “new antisemitism”. This term has not been codified in the Czech legal environment but, from the point of view of the FJC, it is methodologically a useful instrument as it reflects well the essence of unjustified criticism of the State of Israel as specified in the above-mentioned working definition of antisemitism. The concept of new antisemitism refers to the “3D test” as devised by Natan Sharansky.¹³ According to this test, an antisemitic statement is one containing at least one of the 3Ds.

The first D symbolises the demonization of Israel (“Demonization”), i.e. denotation of Israel as evil and aggression incarnate. An example could be the comparison of the politics of Israel to Nazi Germany, or of Palestinian refugee camps to concentration camps, etc.

Sharansky uses the second D to refer to the double standards (“Double Standards”) selectively applied to the State of Israel when judging its foreign policy or internal affairs. Especially in the United Nations Organisation, Israel has been the target of a multitude of biased declarations and resolutions, while other, often non-democratic, authoritarian and totalitarian states are not made to face criticism, and, more often than not, are the ones to step out against Israel to judge whether or not international law and human rights are respected.

The third D symbolises the delegitimization of the State of Israel (“Delegitimization”). Statements denying Israel the right to exist can be considered as antisemitic.

3 | MAJOR EVENTS AND TRENDS IN THE AREA OF ANTISEMITISM IN THE CZECH REPUBLIC

The Czech Republic can be described as a country where antisemitic violence and open discrimination are rare. Nevertheless, the collected data show that the year-on-year rise in the number of antisemitic incidents, especially in the virtual environment, is continuous and dramatic.

The issue that affected almost all spheres of the political and social life in 2022 was without any doubt the Russian aggression against Ukraine. The war conflict, which was initiated on 24 February 2022 by the Russian Federation Armed Forces, became the focal point of public interest instead of the covid-19 disease topics and, as expected, provided room for the formation and dissemination of new disinformation and conspiracy theories, as was the case in 2020 and 2021 in connection with the global covid-19 pandemic. Disinformation platforms protesting against epidemic measures soon made a U-turn and launched pro-Kremlin propaganda, and began to recycle the conspiracies, lies and manipulations originally attributed to covid-19. The continual trend of increased popularity of disinformation web sites is closely related to the rise of manifestations of prejudicial hatred against the Jewish Community.¹⁴ At this point, it is necessary to stress

¹⁴ The Annual Report on Manifestations of Extremism and Prejudicial Hatred of Security Policy Department of MI CR for 2021 e.g. states that of the total of 108 reported crimes motivated by hatred against a certain group, 37 concerned the Jews (cf. in 2020 there was an increase by ten actions): <https://www.mvcr.cz/clanek/extremismus-vyrocní-zpravy-o->

that despite intense activities of the disinformation eco-system and unprecedented acceleration of dissemination of conspiracy theories, the reaction of the Czech society as a whole was full of solidarity with Ukraine under attack and it supported all steps that the Government took towards humanitarian and military aid. Enterprises, public institutions, non-governmental organisations and individuals almost immediately started helping with the necessary care for Ukrainian refugees who were coming to the Czech Republic. The public space was also filled with a great amount of manifestations of solidarity with Ukraine facing aggression, as well as official declarations condemning Russian aggression.¹⁵ Representatives of Czech Christian churches, the Jewish and Muslim community and other religions addressed, in an open letter, the religious representatives in Russia at the end of February 2022 and called on them to use their influence and stop the war in Ukraine.¹⁶

CURRENT SECURITY THREATS

The dynamic development of past-year events requires a rather more detailed look into the relevant context of the manifestations of antisemitism. Within year 2022, all national security, intelligence and analytical institutions, whose conclusions the FJC uses when formulating its key statements, issued their 2021 annual reports. The reports were issued in June by the Ministry of the Interior¹⁷ and the National Headquarters Against Organized

Crime¹⁸ (NCOZ), in September by the Military Intelligence¹⁹ and in October by the Security Information Service²⁰ (BIS). Despite differing purposes and competences as defined by the legislation, all entities are in agreement as far as the general findings are concerned.

Among the actual security threats in the Czech Republic, there are various phenomena which are interconnected and their essence and terminology used make up variable sets. The security community talks of cyber-espionage attacks, disinformation eco-system, conspiracy movements, lone wolves, radicalisation and self-radicalisation or the influence of a foreign power (especially of the Russian Federation, the People's Republic of China and, marginally, also of Iran). With regard to ideology, with a certain degree of simplification, we can discern the following extreme opinion movements:

- The far right, which is constituted especially by isolated groups or individuals. Activities of the neo-Nazi movement take place online in particular; they use social networks frequently and focus primarily on the younger generation.
- The far left, which can include anarchists and orthodox Communists, has been weakening in the long-term and is characterised by *“thematic emptiness and inability of the interested entities to organise larger-scale events”*²¹. They are closed groups with a minimum number of supporters.
- Paramilitary and militia groups, which are decentralised, non-compact and ideologically ambiguous. *“In general, the mentality of members of the*

*militia groups can be characterised as a mixture of ultra-nationalism, positive attitude towards authoritarian regimes (primarily to Russia) and of a general suspicion towards democratic functioning of the society.*²² The militia movement has been stagnating in the long term.

- Nationalistic or “patriotically” oriented and xenophobic populist entities, to which applies a similar characteristic as for the militia groups.
- Religion-motivated extremism, which can present a risk for internal security of the CR in the form of Islamic fundamentalism. *“The Islamic terrorism threat in the CR”,* the BIS states, *“remained in 2021 at a low level”,*²³ especially as a consequence of the defeat of the Islamic State in March 2019.
- The disinformation movement is a specific case of ideological extremism, which can work in symbiosis with any other ideology. Its topics, motivation and aims are so changeable that the term disinformation in itself does not only refer to the ideology of content, but is also a “kind” or “type” of a security threat.

According to the MI CR, the danger of extremism lies in the fact that *“it attacks the fundamental democratic constitutional principles. (...) Extremist attitudes have the potential to turn into activities, which have either direct or long-term destructive impact on the current democratic political and economic system, i.e. it attempts to replace the democratic system with an undemocratic one (...).”*²⁴ Prejudicial hatred is a phenomenon which is, to a certain extent, extremism-independent. Persons or groups which commit prejudicial hatred do take on the rhetoric and activities of traditional ex-

tremist entities, but they do not need to be associated *“with any ideology against the democracy or the constitution. (...) The risks of manifestations of prejudicial hatred are in many areas similar to those presented by the extremists.”*²⁵

The MI CR informs that in 2020–2021 *“a whole spectrum of extremist and xenophobic entities (...) reflected the covid epidemic and the measures associated with it.”*²⁶ Among the primary security challenges is, according to NCOZ (National Headquarters Against Organised Crime), *“the emergence and development of radical online communities”, which “using various decentralised platforms group radical individuals or groups based on shared targets, interests, often also ideologies. (...) The pandemic crisis transformed the existing form of manifestations of the extremist movement.”* Extremists communicate in the online environment, *“the communication channels often consist of more layers”,* which serve to share *“even the know-how, manuals on the production of explosives, dangerous materials, weapons made by 3D printers, instructions and motivational and mobilisation texts or manifests to carry out an attack”.*²⁷ These were also the findings of the BIS (Security Information Service), which stated that the dominant topic on the extremist scene was *“expressing a negative stance to the way we were fighting against the covid-19 disease (...). In general, extremist entities’ activity kept stagnating. The BIS sees the risk in potential self-radicalisation of some slightly mentally unstable individuals, who might, to say the least, be also influenced by the attitudes and information presented by representatives of the extremist, populist or conspiracy scene.”*²⁸

DISINFORMATION SCENE

Years 2020 and 2021 were affected by the covid-19 disease global pandemic, including all its economic, social and societal consequences. The never-ending crisis situation was filled with uncertainty, instability and unpredictability of the development.²⁹ Traditional ideological extremism, in this context, stopped being the primary trigger of anti-democratic or anti-systemic stances and this role was taken over by the disinformation scene.

In Czech environment, the disinformation eco-system is decentralised, but interconnected, and it includes web sites, social networks and chain e-mails. From the point of view of content creation, we can note two trends, which have a symbiotic relation. The first trend is represented by externally coordinated campaigns powered by a foreign entity, it is especially *“influence platforms fully controlled by Russia”*.³⁰ The second trend is the domestic disinformation scene, which produces its own content, but the majority of its content comes from web sites in foreign languages and it multiplies the content from abroad. The motives of domestic disinformers can be: pure ideology, personality and finances. Disinformation web sites have high reading and sharing rates of individual articles on social networks; their producers thus obtain income from advertisements and posts by their readers.

The security community has warned against the destructive potential of disinformation in the long term. Let us recall that on 1 January 2017, the

Centre Against Terrorism and Hybrid Threats (CTHTC) was established at MI CR and one of its focal points is influence and disinformation campaigns.³¹

FIGHT AGAINST DISINFORMATION

Until beginning 2019, disinformation conspiracies contained primarily anti-migration and anti-Muslim narratives, in 2020–2021 their central topic became the covid-19 disease, including all context and consequences – anti-pandemic restrictions, economic and societal implications, vaccination, etc. At the same time, a strong acceleration of disinformation dissemination could be noted, whose authors, as the BIS points out, target in particular *“persons in deteriorating life situation and dissatisfied frustrated individuals”*.³² Naturally, the number of such people during a long crisis situation such as the pandemic rises. Fighting disinformation therefore became one of the accentuated agendas of the government, which was formed after the Parliamentary elections in October 2021. From the beginning of 2022, the government had been lifting up all anti-epidemic measures relatively fast.³³ The most dramatic lifting took place in the course of February, and the society was gradually returning to pre-pandemic life. On Thursday 24 February 2022, nonetheless, the Armed Forces of the Russian Federation began the invasion of Ukraine, and, after the initial shock, it was clear that the robust disinformation scene with a long history was abandoning the covid narrative and soon its topic became the Russian aggression against Ukraine. *“We can confirm”*, the BIS noted, *“that the Czech disinformation scene pragmatically expands its framework with any new topics trig-*

The Russian hybrid influence finds convenient not only the glorification of the local regime, simplification, justification or even the approval of the military aggression, but also the splitting of the Czech society, tension, fear and antagonisms creation, questioning the pillars of a democratic state and calling for the Czech Republic to leave the international democratic community. (...) During a war conflict, weakening the Czech Republic means an existential threat for the democratic rule of law.”³⁵ The Czech Elfs group convincingly proved that pro-Kremlin propaganda content appeared on social networks in groups which had previously focused exclusively on covid and on the vaccination issue.³⁶

As early as on Friday 25 February 2022, the government initiated a whole range of steps towards providing humanitarian and military aid to Ukraine and to help Ukrainian refugees³⁷ who were arriving to CR. During a meeting held on 2 March 2022, the government adopted a resolution to declare a state of emergency *“in order to respond to a migration wave of a large extent”*.³⁸ The state of emergency lasted from 4 March to 30 June. At the same meeting, the government decided that a new post of a *government commissioner for media and disinformation* be created, and on Wednesday 23 March 2022 Michal Klíma was charged with the newly established position. The government press release stated that this step was taken *“due to an intensifying wave of disinformation in the CR, spreading especially from Russia, which is weakening democratic institutions and the international orientation of the CR. The government commissioner has the competence of a government adviser, is subordinate to the prime minister and is nominated and repealed by the government. He/she will coordinate the fight against disinformation and his/her task will be to communicate with respective ministers and heads of public administration institutions and to cooperate with components of the state focusing on the media and disinformation. He/she will also support strategic communication at the Office of the Government and participate in drafting media documents of the national communication and recommend media through which the national communication will take place.”*³⁹ Due to Russian aggression against Ukraine, almost the entire world was struck by a severe security, migration, economic, energetic and raw materials crisis. The polarisation of Czech society caused by a never-ending covid crisis continued. *“The Czech Republic saw the formation of a large, so far indifferent group of people expressing dissatisfaction with the current political structure and national*

orientation. This group is strongly influenced by conspiracy theories and represents an easily manipulatable target for extremist and xenophobic politicians, or for hybrid influence of a foreign power. There exists the potential to put in danger the democratic foundations of the Czech Republic and it can grow.”⁴⁰

On Friday 25 February 2022, i. e. one day after the Russian invasion of Ukraine started, the government adopted a generally formulated resolution⁴¹ calling on “*all relevant entities to adopt the necessary measures to stop spreading false and misleading information in the cyber space, which is used to manipulate the Czech population towards justifying and approving the current Russian military aggression against Ukraine.*” The appeal, addressed to the providers of internet services, was one day later supported by the Military Intelligence, or by the National Cyber Operations Centre (NCKO) set up by the Intelligence.

The administrator of the Czech national domain CZ.NIC promptly reacted to the appeal and blocked eight⁴² web sites spreading disinformation connected with the Russian-Ukrainian conflict: Aeronet.cz, Protiproud.cz, Ceskobezcenzury.cz, Voxpopuliblog.cz, Prvnizpravy.cz, Czechfreepress.cz,

Three months later, on 25 May 2022, CZ.NIC enabled access to the web sites again arguing that an immediate security threat has passed, therefore the blocking has no legal basis.⁴⁵ The CZ.NIC executive director Ondřej Filip stated that *“from the very beginning”* the association *“clearly declared that it was an extraordinary and unprecedented measure which would be reassessed every month in accordance with the domain name registration rules. The idea was to give time to the relevant public authorities to react. That is also why, at the very beginning, the association called on the Czech government to adopt systemic measures in the domain of disinformation dissemination prevention and restrictions in the online environment.”*⁴⁶ In the days that followed, Czech media quoted the statement of the prime minister and government commissioner that shutting down disinformation web sites was only a temporary measure,⁴⁷ and there was no point in keeping it.⁴⁸ Beginning June, the MI CR

informed of drafting the first bill against disseminating disinformation. The proposal was to contain provisions on the possibility to block and limit the range of information sources.⁴⁹ The text of the previously announced legal norm has not been published until the date of publication of this Report.⁵⁰

On 7 June 2022, an NGO *Open Society [Otevřená společnost]* published a press release in which it is stating that, together with *Institute H21*, they are taking action against the Ministry of Defence for illegal procedure when fighting disinformation web sites, arguing that the blockage violated the freedom of speech and the rule of law guarantee.⁵¹ In the first instance decision, the Municipal Court in Prague dismissed the action arguing for example that government recommendations cannot be considered as an intervention by public authority.⁵²

FOLLOW-UP MEASURES AND ORGANISATIONAL CHANGES ON STATE ADMINISTRATION LEVEL

On 1 July 2022, the MI CR stated in a press release that with regard to the current global development, the *Centre Against Terrorism and Hybrid Threats (CTHH)* would from now on focus only on the second of the mentioned agendas and that hereinafter it would function under a new title *Centre Against Hybrid Threats (CHH)*. protection will remain under the competence of another department of the Security Policy Section.⁵³

In compliance with its Policy Statement,⁵⁴ the government decided during its session on 21 December 2022 to establish the post of *national security adviser*, who would work as an extra-ministerial coordinator for hybrid threats, disinformation and other severe security issues exceeding the scope of the ministerial agenda. With effect as of 1 January 2023, Tomáš Pojar was appointed to the newly established post of national security advisor.⁵⁵

For a complete picture, let's add that during a government session which took place on 15 February 2023 the government ruled to cancel the post of government commissioner for the media and disinformation domain.⁵⁶ Michal Klíma, who was dismissed with effective date 16 February 2023, faced criticism for the *Fight Against Disinformation Action Plan*, which was on the agenda. The working version of a document, which was also giving room for disinformation blocking, leaked on 27 December 2022 to the public via Deník N.⁵⁷ The government did not comment the material and prime minister Fiala stated that "*no action plan is necessary*".⁵⁸ On the matter of M. Klíma *“managed to start up strategic communication of the state and thus succeeded in accomplishing the task that he was assigned less than a year ago.”*⁵⁹ The agenda of the cancelled post was passed on to national security advisor Tomáš Pojar. At the same meeting, the government adopted a resolution,⁶⁰ by which it takes into consideration the *Analysis of Czech Republic readiness to face a severe disinformation wave*. A detailed material, which was compiled by MI CR together with the Ministry of Justice and the Ministry of Defence declared by means of introduction: *“From the analysis it follows that the Czech Republic currently does not have a concept, organisational, personnel, procedural, legal or any other instruments or capacities which would be efficient in reaction to a potential attack against the Czech Republic inspired by a purposefully or spontaneously created severe disinformation wave. What is also missing is the support of a society-wide attitude through media literacy and independent fact-checkers or pluralistic media environment.”*⁶¹

CZECH PRESIDENCY IN THE COUNCIL OF THE EU

The current administration, which was appointed by the President of the Czech Republic on 17 December 2021, took on some obligations of the previous Cabinet. One such obligation was the fight against antisemitism, which in connection with conspiracy theories about covid-19 and the war in Ukraine became more pressing. To give a complete picture, in October 2021 the *European Commission* presented the first *EU Strategy on combating antisemitism and fostering Jewish life (2021 – 2030)*.⁶³ The Strategy contains a series of measures based on 3 pillars: (1) preventing all forms of antisemitism, (2) protection and development of Jewish life, and (3) support of research, education and memory of Holocaust victims.⁶⁴ In October 2021, the Czech Republic also committed to improve the situation in the area of combatting antisemitism. On the occasion of the *International Forum on Holocaust Remembrance and Combatting Antisemitism* in Malmö, Sweden, the then Foreign Minister Jakub Kulháněk⁶⁵ presented in his

speech three specific Czech obligations: (1) to set up the Czech national strategy to combat antisemitism, (2) to open a state contributory organisation Memorial of Silence and (3) to organise an international conference on Terezin declaration within the Czech Presidency in the Council of the EU in 2022.⁶⁶ The obligation stated in the middle was met already before the conference in Malmö: on 27 May 2021, the then Minister of Culture Lubomír Zaorálek founded a new state contributory organisation Memorial of Silence⁶⁷ and appointed Pavel Štingl as the statutory director.

The Czech Republic presided the Council of the European Union from 1 July to 31 December 2022. The priorities of the historically second⁶⁸ Czech presidency were considerably influenced by the geopolitical situation and were the following:⁶⁹

- Managing the refugee crisis and Ukraine's post-war recovery
- Energy security
- Strengthening Europe's defence capabilities and cyberspace security
- Strategic resilience of the European economy
- Resilience of democratic institutions

One of the cross-cutting topics of Czech presidency was the fight against antisemitism. On 2–4 November 2022, the Ministry of Foreign Affairs organised at Czernin Palace, Prague, an international conference on the

The conference attended by representatives of 47 signatory nations focused on the support of combatting antisemitism, on the role of education and reparation of wrongdoings from the Holocaust period.⁷¹ Jan Lipavský, the Minister of Foreign Affairs, stated in his intro-

other threats which put our way of life in danger, including racism and antisemitism. (...) Now we are facing an armed conflict in Europe, which we thought would never occur again, as well as blasts of racism and national and religious intolerance. If we don't wish the history to repeat itself, we have to make sure the Holocaust is remembered and give no room for disinformation or distortion of the truth."⁷² As part of the conference was a forum meeting of special envoys and coordinators for combatting antisemitism.⁷³

During 2022, the public space could see brief remarks about the prepared national strategy on combating antisemitism. At the end of January, the Minister of Foreign Affairs J. Lipavský stated that the document would focus on legislative measures, education and fight against hate speech on the internet.⁷⁴ Information about planned strategy then reappeared at the turn of first and second term as a follow-up to AR 2021,⁷⁵ and, for the last time, at the end of the year in connection with other activities of Czech Presidency. The Ministry of the Interior in cooperation with the Permanent Representation of CR in EU organised on 24 November in Brussels an experts' meeting called *Nazi memorabilia and their misuse for antisemitic purposes*. The aim of the meeting was among other things to open a discussion about common understanding of approaches across the EU between the investigative, prosecuting and adjudicating bodies, public institutions, the academic community and also Jewish umbrella organisations. Vít Rakušan, the Minister of the Interior, declared on this occasion that combatting anti-

semitism was an essential priority for the Czech Republic.⁷⁶ When the presidency was coming to an end, the CR presented the delegations of member states a summarised report on the activities in the area of combatting antisemitism and fostering Jewish life: *“Antisemitism is a threat well known not only to Jews in Europe but to the European population as a whole, as it has been present in our society for centuries. Antisemitism is not just a feature on the extreme right and extreme left of the political and ideological spectrum, or a manifestation of religious radicalism. Nowadays, antisemitic attitudes often form part of other worldviews and can for example be hidden behind anti-Zionist rhetoric. Moreover, certain aspects of antisemitic stereotypes are intentional or unintentional features of everyday life, due to deep-rooted images and prejudices, as this latent form is still entrenched in mainstream society. Most recently, antisemitic narratives became part of many COVID-19-related discussions and they have also penetrated the discourse of the Russian Federation in its war of aggression against Ukraine, e. g. with the claims of the alleged ‘de-Nazification’ of Ukraine.”*⁷⁷ However, a Czech national strategy of combatting antisemitism had not appeared by the end of 2022, the latest obligation arising from the international forum in Malmö has thus not been met.

INTERNATIONAL CONTEXT

When analysing Czech international policy in the global context, it should be noted that in June 2022 CR did not join the twenty-two countries with the USA in the lead which condemned the prejudice of UN Council for Hu-

⁷⁶ Vít Rakušan, Minister of the Interior, said in the introductory video: *“Combating antisemitism has always been and will be the utmost priority for the Czech Republic. From our position of politicians and concept planners we have to face challenges and bring solutions which are going to enhance the resistance of the society to hatred. That is why it is also reflected in activities connected with the Czech Presidency.”*: <https://www.mvcr.cz/clanek/ceske-predsednictvi-usporadalo-v-bruselu-celodenni-akci-zamerenou-na-boj-proti-antisemitismu-a-podporu-zidovskeho-zivota.aspx>

man Rights against Israel.⁷⁸ Nonetheless, in November 2022, the Czech Republic voted for a UN Resolution accusing Israel of denying Palestinian Arabs their right for self-determination, denying historical connection of Israel with Temple Mount and calling on the International Court of Justice (ICJ) in the Hague to issue an opinion against the presence of Israel on the West Bank of the Jordan river.⁷⁹

Like in the previously monitored periods, year 2022 also saw formative influence of international events on manifestations of antisemitism in the Czech Republic. An increased number of antisemitic incidents, in particular in the virtual environment, was noted in March, and included the start of the Breakwater Israeli military operation,⁸⁰ the first wave of reactions to the Russian invasion in Ukraine, and in May the antisemitic incidents were connected with the death of Shireen Abu Akleh, journalist of Palestinian-American origin.⁸¹ Crucial international events which had an impact on the Jewish communities around the world in 2022 are covered in Chapter 4. Europe and the world.

3.1 | THE RIGHT AND THE FAR RIGHT

In the period preceding the Russian invasion in Ukraine, far right activists focused primarily on topics associated with combatting the covid-19 disease. They questioned anti-epidemic measures or the pandemic act amendment, and joined the *anti-vaccination movement*. After the breakout of Russian aggression against Ukraine, a significant proportion of the Czech far right saw in Russia an example of a nation standing in opposition to “*the rotten/corrupt West*”.⁸² In symbiosis with pro-Kremlin disinformation platforms, the far right duplicated conspiracy, and often antisemitic, narratives and concurrently protested against the temporary blocking of disinformation web sites at the beginning of 2022. In the context of the Russian-Ukrainian conflict, the MI CR stated that “*some far right entities have become a reliable component of pro-Kremlin fifth column*”.⁸³ For instance, the Workers’ Social Justice Party (DSSS) as well as the National Democracy (ND) issued a declaration in which they justify the Russian Federation.⁸⁴ The far right was also against Czech help to Ukraine in the form of military and humanitarian deliveries as well as against the policy of welcoming Ukrainian war refugees. When restrictions concerning meeting and gathering in public in connection with the covid-19 pandemic were cancelled, the far right entities began to relocate their activity back into the public space. For example, Workers’ Youth (DM) or the National and Social Front (NSF) began organising contact recruitment and propagation campaigns

or sports activities, and started participating in international events organised usually by similar radical groups. In the far right context, the MI CR considers as the most serious security threat *“isolated online communities. They are numerous and their members normally do not express their opinion in the public. Their risk, however, consists in their potential to become lone aggressors.”*⁸⁵ A new extremist subculture, created in the online environment, is, in comparison with traditional extremist structures, more radical, its members have better language skills, are IT-savvy and therefore are at ease when establishing intense contacts with their counterparts abroad.⁸⁶

3.1.1 | TRADITIONAL FAR RIGHT ENTITIES

In February 2022, the leader of far-right party National Democracy (ND) Adam B. Bartoš sent a letter to Vladimir Zhirinovskiy, the leader of the Liberal Democratic Party of Russia (LDPR), with which it made partnership.⁸⁷ In the letter, he assures him that the Czech population is on Russia’s side, and among other things labels Czechia *“a Colony of the West”*.⁸⁸

Workers’ Social Justice Party (DSSS) expressed support to Marian Kotleba, the president of Kotlebovci – People’s Party Our Slovakia [Kotlebovci – Ľudová strana Naše Slovensko], who received a suspended sentence order for the criminal act of expressing sympathies with a movement aiming to restrict the fundamental rights and freedoms.⁸⁹ In the February declaration,

published at DSSS's web site, the party's executive deputy president Jiří Štěpánek also stated: *"It is no coincidence that Marian Kotleba is facing justice in an invented case in "cheques" (...) And the ruling establishment wants to remove Marian Kotleba from the political scene at all cost – he symbolises Slovakia's fight for state and national independence."*⁹⁰

A stable characteristic feature of the far right ideology and narrative are manifestations of antisemitism. For example in 2022, DM group representatives presented the opinion that it was necessary *"to destroy the system of this decadent degenerate democracy"*, in which the democrats were giving advantage to *"the inadaptive and non-white race"*. In reaction to the war in Ukraine, the DM adopted the antisemitic conspiracy theory about *"a campaign against European nationalists under the baton of Zion"*. This theory is based on the premise that the goal of the war conflict currently taking place, managed by the Jews, is to harm two white nations with the help of *"mongoloid nations and Muslim Caucasians"*.⁹¹ The DM is an openly anti-

⁹⁰ The full version of DSSS's executive president is available here: http://www.dsss.cz/dsss-a-lsns_spoluprace_statecnost-a-odhodlani. During a visit of a secondary school in Banská Bystrica in 2017, M. Kotleba publicly handed over a financial gift to three families using symbolic cheques. Each cheque was for the sum of EUR 1,488, while numbers 14 and 88 are well-known and used as symbols of extremism. In this context, a specialised criminal court in Pezinok condemned him in October 2020 to a term of imprisonment of 4 years and 4 months for the crime in relation to the foundation, support and promotion of a movement aiming to suppress fundamental rights and freedoms. The defendant appealed from the court's decision. In April 2022, he was found guilty also by the Slovak Supreme Court, which nonetheless mitigated the legal qualification of the action and condemned M. Kotleba for the criminal act in relation to showing sympathies to a movement aiming to suppress fundamental rights and freedoms. In this context, he was condemned to a term of imprisonment of 6 months with 18-month probationary period. The verdict of the supreme court's judges on the bench, from which it is not possible to appeal, also implies that M. Kotleba lost his mandate of a deputy: <https://ct24.ceskatelevize.cz/svet/3466089-kotleba-prisel-o-mandat-poslanec-soud-ho-uznal-vinnym-z-extremismu> and <https://romea.cz/cz/zpravodajstvi/zahranicni/prokurator-predlozil-nove-dukazy-proti-kotlebovi.extremista-si-bere-cas-dnesni-soud-odlozen>.

semitic and homophobic group with a *“profile of extreme hate rhetoric and threatening messages”*.⁹²

In the course of last year, far right entities resonated with international cases connected with combatting extremism. Probably the most apparent was the support given to a German senior citizen who had been denying the Holocaust for a long time.⁹³ Some far right radicals from various groups designate her as *“a fighter for the freedom of speech”* and highlight her *“bravery”*.

3.1.2 | XENOPHOBIC POPULIST POLITICAL PARTIES AND ENTITIES

In the aftermath of the war conflict in Ukraine, politicians and activists from the xenophobic populist scene have neglected *“the topics of the alleged Islamisation of the West, migration and setting themselves against “covid totalitarianism”. Before and during the Russian aggression, they repeated more or less modified claims of Kremlin propaganda.”*⁹⁴

“Before the Russian invasion, the Freedom and Direct Democracy (SPD) movement claimed that Ukraine, with the help of NATO, wanted to provoke

⁹³ 94-year-old Ursula Haverbeck was condemned prior 2018 in eight cases in association with the Holocaust denial and inciting to hatred, and was committed to prison for the total of two years. The last, i.e. six-month punishment, was rendered by the court in October 2017. The convict was supposed to present herself to execute her sentence in April 2018, but she failed to do so. Consequently, she was arrested beginning May 2018 based on arrest warrant in Vlotho, North Rhine–Westphalia, Germany: https://www.irozhlaz.cz/zpravy-svet/popiracka-holokaustu-nemecko-berlin_1805072125_rez. *a military conflict with Russia. (...) However, after the Russian invasion of the neighbouring country, the SPD said in a statement that this was a violation of international law. Over time, however, the movement began to revert to a line that suited the Kremlin.*⁹⁵ With the exception of the Freedom and Direct Democracy movement, domestic xenophobic populist entities can be considered marginal.⁹⁶

3.2 | THE LEFT AND THE FAR LEFT

The activities of the anarchist movement and the platforms of orthodox communists in 2022 were dominated by the Russian aggression against Ukraine. In the context of extremism, both currents of opinion remain quite marginal and peripheral. In particular, the orthodox communists fail to reach out to young activists, and their older generation is no longer publicly active.⁹⁷ However, the unchanging characteristic of their ideology, alongside their uncritical support for the Russian Federation, remains a strong anti-semitic accent.

Manifestations of antisemitism by representatives of the left and the far left have long fallen most often into the category of *new antisemitism*, aimed at illegitimate criticism of the State of Israel as defined by the IHRA's working definition of antisemitism and Natan Sharansky's 3D test. In their

speeches and commentaries, some pro-Palestinian and leftist activists and groups not infrequently demonize the State of Israel in its legal system and domestic and foreign policies, describing it as an “*apartheid state*”, a “*racist state*”, an “*occupier*” or an “*aggressor*”.

The repeal of emergency anti-epidemic measures in 2020–2021 brought the activities of the far left back into the public sphere in 2022.

In May, Ilan Pappé, originally an Israeli historian, leftist activist and a leading figure in the BDS movement, who has been based in the UK since leaving Israel, visited Prague. During his visit to Prague, he presented his first book translated into Czech. In the book entitled *Ten Myths about Israel*,⁹⁸ he tries to refute the official interpretation of Israeli history. According to the criteria of the 3D test, he based his revisionist interpretation mainly on the demonization and delegitimization of the State of Israel. Pappé has also spoken at several public events, including two separate panel discussions with former Czech Foreign Ministers Karel Schwarzenberg and Lubomír Zaorálek.⁹⁹

The visit to Prague of Professor I. Pappé from the University of Exeter was covered by several domestic mainstream media, such as Lidové noviny and Seznam Zprávy. In an interview with Lidové noviny, I. Pappé said, among other things: “*In my opinion, Israel will become an even more apartheid state than it already is. Gradually, it will totally take off its democratic mask, which*

it is partially keeping on (...) I believe that in the end Israel will be treated like apartheid South Africa."¹⁰⁰ In his contribution to a panel discussion with Karel Schwarzenberg at the Scout Institute in Prague's Old Town Square, he also said, *"I know that Israelis, including those of the liberal-Zionist stream, are looking for a form of occupation that is cheap, accepted by the rest of the world, and easier to maintain. And that is the best Israel can offer as a two-state solution."*¹⁰¹

On Tuesday 24 May 2022, it was also released in the online environment, with a different title: *Controversial Israeli historian: Russians do to the Ukrainians the same things that we are doing to the Palestinians. In May, the first year of the two-day festival of Israeli culture called *Israel on the Vltava River*¹⁰² (Izrael na Vltavě) took place in Prague. A few days before the event, the initiatives *Not in Our Name – For Just Peace in the Middle East* and *Jewish Voice of Solidarity* published a joint press release with the aim to “draw attention to the fact that the *Israel on the Vltava* festival, held in Prague on Sřelecký Island on 14–15 May, attempts to obscure the reality of the occupation by ignoring the suffering of the Palestinians and deliberately ignoring the criminal policies of the State of Israel against them.”¹⁰³ The press release also announced the activists’ intention to “point out the less flattering aspects of Israeli culture” and set up their own petition stand, which was located near the festival grounds on both days of the event. One of the materials that the activists distributed to festival visitors was a *Petition against the normalisation of occupation, colonisation and segregation* (see more in the analytical section 5.5.2 Public Space).

At the end of May, the attention of the global and Czech public and media once again turned to the ongoing Israeli–Palestinian conflict. During the clashes between Israeli security forces and Palestinian radical militants in the West Bank, Shireen Abu Akleh, an American-Palestinian reporter for the Qatari television station Al Jazeera, was shot dead on 11 May 2022 while covering an IDF raid.¹⁰⁴ Further rioting then occurred in connection

¹⁰⁴ Qatari authorities and Palestinian public immediately accused the IDF from her death. Israel proposed joint investigation of the reporter’s death, the Palestinian self-government refused the possibility. The IDF press release issued in September 2022 stated that “it appears that it is not possible to unequivocally determine the source of the gunfire which hit Ms. Abu Akleh. However, there is a high possibility that Ms. Abu Akleh was accidentally hit by IDF gunfire that was fired toward suspects identified as armed Palestinian gunmen, during an exchange of fire in which life-risking, widespread and indiscriminate shots were fired toward IDF soldiers.”: <https://www.idf.il/en/articles/2022/final-conclusions-of-shireen-abu-akleh-investigation/>

with Sh. Abu Akleh's funeral in Jerusalem.¹⁰⁵ In addition to legitimate criticisms of the details of the Israeli military operation, a large number of simplistic and arbitrary responses soon appeared in the global arena calling for international isolation, sanctions or even liquidation of the State of Israel. Content-wise, these reactions corresponded to expressions of the new antisemitism. In this context, a peaceful rally called *Manifestation for Shireen Abu Akleh* was held in Prague with the participation of Czech pro-Palestinian activists. The Israeli state apparatus was labelled apartheid during the speeches, and critical proclamations were also directed at the Czech mainstream media, which, in relation to the killing of the Al Jazeera reporter, allegedly “presents the opinions of pro-Israeli journalists instead of facts”.¹⁰⁶

In October 2022, the next meeting of the EU-Israel Association Council was held in Brussels after a ten-year break. It discussed EU–Israel relations in the context of global challenges, such as Russia’s military aggression against Ukraine, the global energy crisis and growing food shortages. Discussions focused on trade, climate change, energy, science and technology, culture, respect for human rights and democratic principles, freedom of religion and the fight against antisemitism.¹⁰⁷ The resumption of EU negotiations with Israel has met with disapproving reactions, particularly from the part of pro-Palestinian activists. On the day of the official meeting, the *Not in Our Name – For a Just Peace in the Middle East* initiative, together with other “*Czech and Jewish initiatives opposing the joint EU-Israel Association Council meeting*”, convened an online press conference attended by representatives of Human Rights Watch (HRW), Amnesty International (AI) and Al Haq.¹⁰⁸ The conference agenda included, among other things, discussions on “*Israeli apartheid*” or “*the EU’s contribution to the immunisation of Israel’s violation of human rights*”¹⁰⁹

3.3 | DISINFORMATION PLATFORMS

The topics dominating disinformation platforms throughout the pandemic period were lies, manipulations and conspiracies connected with the covid-19 disease. Right after the invasion of troops of the Russian Federation on the territory of Ukraine, the disinformation eco-system turned its

attention towards pro-Kremlin propaganda. There was a moderate recession in reaction to the high degree of solidarity of Czech public with Ukraine and equally during the temporary shut-down of certain web sites. As MI CR mid-term reports pointed out, disinformers reacted to blockage measures by “*turning to social networks, new communication platforms, or back-up web sites*” and focused also on “*anti-system attacks*”.¹¹⁰ Disinformation media often tended to express xenophobic outbursts, prejudicial hatred, trigger fear or hatred, and in some cases directly incited to violence.¹¹¹ A stable part of disinformation media content became antisemitic conspiracy theories, whose number grew steadily. “*Antisemitic propagandists*”, the MI CR points out, “*probably in an attempt to avoid criminal sanctions even sign articles with names of unknown persons.*”¹¹²

3.4 | PUBLISHING ACTIVITY

The number of newly published books with antisemitic content has been in decline in the CR in the long term. While in 2015, 15 titles¹¹³ which can be considered as antisemitic literature in compliance with the mentioned

methodology were published, in 2022, like in 2021, no piece of literature of such kind which would be newly published was registered.¹¹⁴ One of the reasons of declining publishing activity is without any doubt the considerable attention which investigative, prosecuting and adjudicating bodies have dedicated to antisemitic literature in the past few years.

In January 2022, the court in Žďár and Sázavou found Bodyart Press and its agent guilty for denying, questioning, approving and justifying the genocide, and fined them with the total amount of CZK 60,000. The punishment concerned the case of publishing the book *The Myth of the Six Million*,¹¹⁵ which denies the Holocaust. In June 2022, the Regional Court in Brno confirmed the financial penalty for the publishing house and its agent.¹¹⁶

Since 2021, *Radix*, a randomly issued magazine, subtitled *Magazine for Brain Owners*¹¹⁷ has been circulating in the CR. The managing directors of the company issuing the magazine are Pavel Kamas and Lukáš Novák, who, together with a few other persons, were taken to court in June 2021 in the Guidemedia etc., s.r.o. publishing house case for denying, questioning, approving and justifying the genocide.¹¹⁸ In the course of 2022, two issues of the periodical were on sale. Both contained conspiracy statements with antisemitic overtones (see example in section 5.5.4. Printed media).

¹¹⁴ In the long term, monitoring focuses exclusively on the activity of far right publishers, not on standard and well-established publishing houses.

¹¹⁵ *The Myths of the Six Million* is one of the most well-known books denying the Holocaust. The author David L. Hoggan e.g. states in the book that the data of six million Jewish victims of Nazism is "intentional and shameless" falsification of history and that it is a "genocidal legend": https://www.idnes.cz/jihlava/zpravy/bodyart-press-obzaloba-kniha-popirani-holokaust-soud.A211115_184203_jihlava-zpravy_pp

3.5 | OTHER IMPORTANT CASES INVOLVING THE MEDIA

After the loosening of anti-epidemic measures, the long-term trend of manifestations of antisemitism from the part of football fans returned to the centre of attention of the general public and the media. The dominant feature of *football antisemitism* is cheering “*Jude Slavie/Slavia*” and labelling SK Slavia Prague players and supporters “*Jews*” or FC Baník Ostrava fans “*Polish Jews*”. These verbal manifestations contain in themselves a negative connotation because their purpose is to insult a competitive club.¹¹⁹ The cheering “*Jude Slavie*” was noted from one part of Sparta fans for example

¹¹⁹ Miroslav Mareš, expert on extremism from Masaryk University in Brno said in 2017 for *Aktualne.cz*: “*The question is whether those who shout out loud even know what they are shouting.*” He concurrently points out the apparent connection of hooligan fan scene with the ultra-right, which identifies itself with antisemitism. Leo Pavlát, director of the Jewish Museum in Prague (JMP), stated in this context that it would be misleading to seek in the mentioned shouting anything else than a manifestation of antisemitism, adding that: “*For neo-Nazi, antisemitists in general, the word Jew is an insult or dirty word.*”: <https://sport.aktualne.cz/fotbal/ceska-liga/jude-slavie-temna-skvrna-derby-je-to-vsem-jedno-naposledy-za/r~1f26fa6a12cd11e7903d0025900fea04/>

in October 2022 during a AC Sparta Prague vs. FK Pardubice match, and markedly during the 304th Prague derby.¹²⁰ The phenomenon of Czech football antisemitism is not only delineated by CR borders, as can be proved for example by an incident documented in Cluj, Romania. During an October match SK Slavia Prague vs. CFR Cluj a banner saying “*You’re just Jewish Slavia*” was held by the Romanian football club fans.¹²¹

His reaction was that *“The League Football Association is fully aware of the severity of the situation and condemns any such behaviour of one part of football “supporters” and rejects it.”*¹²² Follow-up written communication regarding concrete steps to be taken against manifestations of antisemitism during football matches did not bring any results. The repeated requests of L. Pavlát in this matter (last one in January 2023) have not been answered by the LFA executive director (at least not before the drafting of this report was finalised).

Patrik Tušl, a disinformant and pro-Russian activist, was accused of denying, questioning, approving and justifying the genocidium in 2022 after he and a few other people shot a video at the entrance to the Small Fortress in Terezin in which they question the existence of gas chambers in the concentration camps during World War II, and published it on the Facebook social network.¹²³

lice.¹²⁴ For the purposes of statistical data processing, the Police is using a *tactical-statistical classification* (TSC) with its own codes for individual crimes and their combination and with a classification of crimes into groups with specific labelling.

Of the total amount of 17 registered crimes of defamation of the nation, race, ethnic and other group of people (sec. 355 of the Criminal Code), 2 actions had an antisemitic motive or subtext in 2022. In comparison with the last period monitored, when one similar action was committed, no considerable statistical change occurred.

A relatively stable trend with year-on-year increase by a few units can be seen in the category Registered crimes of inciting hatred against a group of people or inciting the restriction of their rights and freedoms (sec. 356 of the Criminal Code). Four recorded actions with antisemitic motivation recorded in 2022 follow the period (year 2021) when three actions had an antisemitic motive or subtext. In 2020 and 2019, two actions were recorded in this group.

The total number of crimes in relation to attack against humanity, genocide according to sec. 400, 401, 405¹²⁵ in 2022 reached 25 (in 2021 they were only 7). Two actions had an antisemitic motive or subtext. It is clear that although the total number of crimes in this category rose more than triplefold, the increase was not reflected in registered actions motivated by antisemitism. In the category of crimes in relation to founding, supporting and promoting a movement aiming to restrict rights and freedoms of a person according to sec. 402, 403,

¹²⁴ The total number of registered actions according to TSK for 2022 can be found here: <https://www.policie.cz/clanek/statisticke-prehledy-kriminality-za-rok-2022.aspx>. The information on the number of registered actions with antisemitic motive or subtext was provided by the Police Presidium of the Czech Republic upon request.

¹²⁵ Sec. 400 Genocidium, sec. 401 Attack against humanity, sec. 405 Denial, questioning, approving and justifying the genocidium.

403a, 404,¹²⁶ the total amount of crimes reached 52, while 14 actions had an antisemitic motive or subtext. In this category, there was a considerable year-on-year decline – in 2021, 23 antisemitically motivated actions were registered.

In all categories, it is relevant to note that the majority of crimes in relation to violence motivated by hatred remain unreported, and, more often than not, the motive or subtext cannot be confirmed with certainty.¹²⁷

4 | EUROPE AND THE WORLD

The degree, manifestations and trends of antisemitism in the Czech Republic are closely connected with the situation in neighbouring countries, in the European Union, in Europe as a whole and around the world.

The Internet, social networks in particular, presents in the global context the key platform for spreading antisemitic prejudice, conspiracy theories and stirring up hatred towards the Jewish community and also individuals. The real proportion of the above statement can be meaningfully illustrated by a recent experiment of the United States House Select Committee to Investigate the January 6th Attack on the United States Capitol.¹²⁸ The Committee created a fake profile of Alice, a forty-one-year-old woman from Acton, Massachusetts, on the TikTok social network. Without any interaction or activity, it took 75 minutes before the social network started offering the fictive Alice videos with Nazi content.¹²⁹ Sharing extremist content on social networks is therefore not based only on users' activity, but also on a generic algorithm of the applications themselves.

Among the main factors which influenced manifestations of antisemitism and their content in 2022 was the dying away covid-19 pandemic, the war

in Ukraine, racist and conspiracy theories of far right radicals and anti-semitic discourse of anti-Israeli attitudes.¹³⁰

The wave of antisemitic conspiracy theories connected with the fading away covid-19 pandemic¹³¹ transformed its content as early as at the end of February 2022 towards the issue of war in Ukraine.¹³² Almost immediately after the breakout of the Russian–Ukrainian conflict, the extremists

¹³⁰ This follows from several pieces of research and reports: e.g. Top 10 global antisemitic incidents of 2022 were published by Simon Wiesenthal's centre: <https://www.wiesenthal.com/assets/pdf/2022-top-ten-worst-global.pdf>; A report of the American Anti-Defamation League, ADL: <https://www.adl.org/resources/report/antisemitic-attitudes-america-topline-findings>; A report of the NGO Community Security Trust (CST), focusing on the security of the British Jewish community, is available in English here: <https://cst.org.uk/public/data/file/e/6/CST%20Incidents%20Report%202022.pdf>

¹³¹ Anti-covid activists and anti-vaccine advocates also showed globally strong conspiracy thinking, moreover one part of their opinion spectrum compared the impact of anti-epidemic measures to the status of Jews during World War II and used the yellow six-pointed star as a generally understandable symbol of the Holocaust. E.g. in February 2022, they protested for the freedom of a woman condemned for racial hatred and spreading antisemitic conspiracies in London: <https://cst.org.uk/news/blog/2022/07/19/covid-conspiracies-jew-hate-antisemitism-in-the-covid-19-conspiracy-movement>

¹³² On Thursday 24 February 2022, Russia started an attack on Ukraine. Russian President Vladimir Putin denominated the act as *"a special military operation against the threats coming from Ukraine"*. In reaction to the attack, the state of war, martial law and mobilisation were declared in Ukraine.

began using it to intensively disseminate antisemitic conspiracy narratives, containing also such statements as *The war in Ukraine in itself is a Jewish conspiracy*, or that *the State of Israel intentionally uses crisis situations to enforce its own interests and goals*.¹³³ The report of the Israeli Ministry for Diaspora Affairs of March 2022 states that, in comparison with March of the previous year, there was a 40% rise in the amount of antisemitic posts on social networks. Just in the 24 February – 28 March 2022 timeframe, the social network environment recorded ca. 55,000 posts with antisemitic overtones, whose main theme was the Russian–Ukrainian conflict.¹³⁴

SECURITY INCIDENTS

In many countries around the world, there were many antisemitically motivated physical assaults against individuals, arson attacks on Jewish property as well as public inciting to violence on the Jews in 2022.¹³⁵ There was, nonetheless, no attack recorded which would result in death. The positive balance of this statistics is to a certain extent caused by the fact that the security services in the Western countries managed to thwart several pre-arranged terrorist attacks with potentially fatal consequences. Active security measures implemented by the Jewish communities and, in some cases, mere coincidence undoubtedly played an important role.

One of the most severe antisemitic incidents in 2022 was the “barricade situation” in the Congregation Beth Israel synagogue, Colleyville, Texas, USA. A forty-four-year-old British citizen Malik Faisal Akram, who arrived

in the USA two weeks before the attack, entered the synagogue during the morning Shabbat religious service on 15 January 2022, and, by using a firearm, he took four persons including the rabbi as hostage for as long as eleven hours. No one was injured during the attack, the incident was ended by a special intervention unit, which broke into the synagogue and shot the perpetrator.¹³⁶

The US security services managed to thwart several attacks in 2022. In July, Matthew Belanger, neo-Nazi group member and ex-marine service-member of the USA was arrested for planning mass murders, including an attack on a synagogue in New York.¹³⁷ In November, Omar Alkattoul, eighteen-year-old Islamist who threatened to attack a synagogue and a Jewish community in New Jersey, was caught.¹³⁸ A few days later, two white supremacists, Christopher Brown (22) a Matthew Mahrer (21), were apprehended for planning a terrorist attack on several synagogues in New York. From available information it follows that they were not vague threats but a specific plan, which was turned down thanks to a quick police intervention. The police found the accused persons' backpack with firearms and laser sights, one of the accused also administered an online

¹³⁶ The morning shabbat service was streamed by Congregation Beth Israel life on its web site on Facebook social network and via the Zoom platform. Before the recording was interrupted and removed from the social network, it captured a part of the incident. https://www.washingtonpost.com/politics/some-people-just-dont-like-us-in-a-texas-synagogue-11-hours-of-terror/2022/01/16/3538f950-76d4-11ec-bf97-6eac6f77fba2_story.html.

¹³⁷ From available information it follows that M. Belanger during his active service in 2016 joined the neo-Nazi group called "Rapekrieg". In the group manifesto which he helped create, it says e.g.: *"one who isn't willing to kill a Jewish child cannot be part of the group."* He acquired weapons, uniforms and tactical equipment for the other members and they planned the synagogue attack together: <https://edition.cnn.com/2022/07/28/us/former-marine-plotted-attacks-jewish-targets/index.html>

¹³⁸ On social networks he published a manifesto infiltrated with hatred towards the Jews, e.g. stating that the target of his attack is the synagogue and that *"it is the Jews who are promoting greatest hatred towards the Muslim people"*: <https://www.npr.org/2022/11/10/1135807132/charged-new-jersey-synagogue-threats>

group gathering white supremacists and owned a collection of Nazi memorabilia.¹³⁹

In November, there was a series of security incidents in the German state North Rhine–Westphalia. In Essen, several shots were fired at a rabbi's house next to the Old Synagogue, in Dortmund, someone attempted to perform an arson attack at a synagogue, and, in Bochum, a Molotov cocktail was thrown at a Jewish school. No one got hurt during the incidents. German security corps accused the Iran's Revolutionary Guard Corps from planning and performing these attacks.¹⁴⁰

Antisemitically motivated was also the October attack with a firearm in front of Tepláreň bar in the centre of Bratislava, the meeting point of the local LGBT+ community.¹⁴¹ Nineteen-year-old Juraj Krajčík, adherent of far right ideology, posted a long manifest comprising antisemitic conspiracy theories on the Twitter social network a few hours before the attack. He confessed that from the age of sixteen he had been systematically preparing for a future attack against *"Zionist occupation government"*

¹³⁹ Threats with an antisemitically-motivated attack were recorded on the Twitter social network. The investigators succeeded in identifying the computer from which they were sent: <https://www.cbsnews.com/newyork/news/sources-man-suspected-of-planning-attack-on-new-york-city-synagogue-under-arrest/>

¹⁴⁰ In connection with the attacks, the police detained a thirty-five-year-old man from Dortmund, who had German and Iranian citizenship. Allegedly, he also attempted to convince another man, who later became the primary witness in the whole case, to make an arson attack at a synagogue in Dortmund. From the investigations it followed that the detained man had been in contact with a German-Iranian citizen Ramin Y., who is under an international arrest warrant because he is accused of murder. Based on information provided by the police, a group around Ramin Y. also followed the president of the Central Council of German Jews, Josef Schuster: <https://www.algemeiner.com/2022/12/01/hells-angels-gang-leader-accused-of-coordinating-attacks-on-jewish-targets-in-germany-on-behalf-of-iranian-regime/>

¹⁴¹ The attack took place on Wednesday 12 October around 19:00 in Zámocká Street. Two men died during the attack and a waitress from the bar was injured: https://www.irozhlas.cz/zpravy-svet/gay-bar-strelba-bratislava-terorismus_2210141501_mfk

(ZOG),¹⁴² and from the analysis of posts which he shared on social networks before the attack and right afterwards it follows that he presumably also planned to attack the Chabad Jewish centre.¹⁴³

DEMONIZATION OF ISRAEL

Any outburst of the lengthy Israeli–Palestinian conflict triggers an extremely strong global reaction not only against the State of Israel but often also against the Jews in general.¹⁴⁴ In 2022, the scenario repeated itself when the tension between Israel and Palestinian radicals escalated in many Palestinian attacks on Israeli targets and in the form of attacks of Israeli security forces on Palestinian territories. According to IHRA, the working definition of antisemitism explicitly states that *“criticism of Israel similar to that which is applied also towards other countries cannot be considered as antisemitism”*. On the contrary, narratives which associate Israeli policy with terms such as *“racism”*, *“Nazism”* or *“apartheid”*, as well as *“collective accusation of Jews of the steps taken by the State of Israel”*, are nothing else than antisemitism hidden behind anti-Israeli or anti-Zionist stances. Let’s say, in this context, that pro-Palestinian or anti-Israeli actions and initiatives in public space as

¹⁴² ZOG is an acronym for *“Zionist Occupied Government”*, which is used by the far right and supremacists to claim that (not only) the American government is controlled by the Jews. The acronym is often used with other expressions, e.g. *“overthrow the ZOG”*, *“annihilate the ZOG”* or *“death to ZOG”*: <https://www.adl.org/resources/hate-symbol/zog>

¹⁴³ The attacker’s own profile on the Twitter social network contained a number of posts, in which the account owner had expressed for many months his admiration and respect to the far right or Nazi officials. In one of the posts, which he published in mid-August, he made a selfie right in front of the Tepláreň bar. On the same day, he made a similar selfie photograph in front of the Chabad Jewish centre.

¹⁴⁴ The Annual Report on Global Antisemitism of the Ministry of Diaspora Affairs also pointed out the dramatic increase of antisemitic hate online posts in the previous period monitored: https://www.gov.il/BlobFolder/news/wzo24012022/en/file_2021%20report-final.pdf The outburst of Israeli-Palestinian conflict in 2021: a series of reciprocal armed attacks between the IDF (Operation Guardian of the Walls) and Palestinian resistance organisations (Operation Sword of Jerusalem led in particular by the Hamas movement and the Palestinian Islamic Jihad). well as in the online world have in the long term been accompanied by manifestations of antisemitism in various forms and intensity. In 2022, this happened in particular (but not exclusively) in connection with reactions to the death of Shireen Abu Akleh, Qatar reporter of Al Jazeera TV channel.¹⁴⁵

For example, on 24 April, about 600 protesters marched in Berlin with Palestinian flags and shouted “killer of children, Israel”. The crowd also encircled the Bild daily journalist, and while shouting “you dirty Jew” and other aggressive antisemitic insults, some of the demonstrators began physically attacking and kicking him.¹⁴⁶ During an anti-Israeli demonstration

¹⁴⁵ See chapter 3.2.

¹⁴⁶ After police intervention, the reporter was escorted to a safe place. A follow-up pro-Palestinian and anti-Israeli demonstration titled “a protest demonstration against Israeli aggression in Jerusalem”, which had been announced for 29 April, was forbidden. The police added that organising any supplementary event until 1 May 2022 is not allowed. The reasoning behind the decision was experience with previous protests in which manifestations of antisemitism and calls for violence could be heard: <https://www.bild.de/news/inland/news-inland/antisemitische-demo-in-berlin-wieder-offener-judenhass-auf-deutschlands-strassen-79861108.bild.html>

at Downing Street in London on 10 August, the crowd called on all “Zionists” to “go home” and kept shouting “*There is only one solution – intifada revolution*”. One of the protest participants brought a banner saying “*Stop judaisation of Jerusalem and Britain, Europe and Ukraine and the USA*”. Other posters proclaimed e.g. “*Zionism uses Jews as human shields*” or “*Hamas, they are galant fighters for the Palestinian cause, who show enormous bravery against the power of the Israeli army.*”¹⁴⁷

Between legitimate criticism of the State of Israel and its demonization, there is a clearly defined boundary, which the current discourse refuses to respect more and more often and more intensely, and considers subjective hatred as objective criticism. The antisemitic paradigm thus becomes a norm and penetrates mainstream media, politics and for example the specific microcosm of University campuses.¹⁴⁸ A certain role in this process is also played by some international organisations, which more often than not act in an unbalanced and ahistorical way. Through one-sided interpretation and context ignorance they directly or indirectly legitimise terrorist activity of one part of the Palestinian opposition and concurrently actively contribute to the dissemination of antisemitic narratives.

In February 2022, the Amnesty International (AI) organisation published an extensive report entitled *Israeli Apartheid Against the Palestinians: A Cruel System of Supremacy And Crime Against Humanity*,¹⁴⁹ in which the State of Israel is accused of the international crime of apartheid. The text

of the report demonizes and delegitimizes Israel, i.e. denies its right for existence. Soon after its release, the online space was flooded with a great number of antisemitic reactions, a few examples have been selected below:

¹⁵⁰ In August, Palestine’s President Mahmūd Abbās announced at a press conference following his meeting with German chancellor Olaf Scholz that the State of Israel “has committed fifty holocausts in Palestinian towns and villages since 1947.” The reasoning behind this proclamation was why, from his position of Palestine’s headman, he is not going to apologise for the terrorist attack at the Olympic Games in Munich of 1972, whereby the Palestinian terrorist organisation Black September murdered 11 Jewish sportsmen. The German chancellor condemned these statements the following day by means of a proclamation on the Twitter social network: <https://www.seznamzpravy.cz/clanek/zahranicni-nemecky-kancler-odmitl-abbasuv-vyrok-o-izraelskem-holokaustu-sam-celikritice-211821>

its aggression in Ukraine were the subject of six resolutions.¹⁵¹ Behind the resolutions stood not only Arabic or Muslim nations or countries of the third world. In 2022, EU member states voted for one criticising resolution per each of the following countries: Iran, Syria, North Korea, Myanmar and the USA (for its embargo on Cuba) and six resolutions on the Russian war in Ukraine. In sharp contrast to these statistics is the fact that the majority of EU nations voted for around 10 resolutions on Israel.¹⁵²

COMBATTING ANTISEMITISM – EUROPEAN UNION AND UNESCO

In October 2021, the European Commission presented the first EU *Strategy on combatting antisemitism and fostering Jewish life (2021–2030)*.¹⁵³ The Strategy contains a series of measures focusing on the prevention and elimination of all forms of antisemitism; the protection and development of Jewish life in EU; education, research and remembrance of the victims of the Holocaust. The fight against racism and antisemitism has also become one of the political priorities of the French Presidency of the Council of the European Union¹⁵⁴ in the first half of 2022. On 4 March, the EU

¹⁵¹ For a long-term comparison: From 2015 to 2022, including the above-mentioned, The UN General Assembly adopted 140 resolutions on Israel and 68 on other countries: <https://unwatch.org/2022-2023-unga-resolutions-on-israel-vs-rest-of-the-world/> UN Watch Database also documents that from 2006 to 2022, the UN Human Rights Council adopted 99 resolutions against Israel, 41 against Syria, 13 against Iran, 4 against Russia and 3 against Venezuela. UN Watch is an NGO with headquarters in Geneva, whose mission is to monitor the activity of the UN and to verify whether the principles of its own Charter are respected.

Council adopted conclusions on combating racism and antisemitism.¹⁵⁵ In these conclusions, the Council, among other things, deplored the “*alarming rise in racist and antisemitic incidents in EU member states*”, which it invited “*to develop action plans and strategies*” on the issue “*by the end of 2022*”.¹⁵⁶

In response to the huge increase of antisemitism in the EU, the Federal Chancellery of Austria set up the *European Conference on Antisemitism*, which held its first meeting in Vienna on 18–19 May.¹⁵⁷ The pre-announced aim of the conference was to develop a standardised and common European methodology for monitoring manifestations of antisemitism according to the IHRA’s working definition, including incidents that do not accomplish the body of a crime. A standardised methodology is one of the yet unaccomplished visions of the *Strategy on combating antisemitism and fostering Jewish life (2021–2030)* and aims to uncover the real extent of antisemitism in Europe based on data that can be compared over time and between member states. The interim outcome of the Austrian initiative is the *Vienna Declaration on enhancing cooperation in fighting antisemitism and encouraging reporting of antisemitic incidents*.¹⁵⁸ To the date of release of this AR, 11 member states have signed the Declaration, including the Czech Republic.

On 1–2 June, the *European Commission* held the second meeting of the *Working Group on the implementation of the EU Strategy on combating an-*

The main topics of the meeting were the antisemitic narratives and disinformation used by the Russian Federation to justify its unprovoked invasion of Ukraine, updates on the development of national strategies and action plans to combat antisemitism, the security needs of Jewish communities and a standardised methodology for monitoring antisemitic incidents.¹⁵⁹

*B'nai B'rith International*¹⁶⁰ and *the Institute for Strategic Dialogue*,¹⁶¹ in collaboration with UNESCO, have produced a document entitled *Online Antisemitism: A Toolkit for Civil Society*.¹⁶² The document, which was presented to the public on 7 June in Paris,¹⁶³ aims to provide civil society with guidance on how to deal with the threat of antisemitism in the online environment.¹⁶⁴

On 27 June, an international symposium entitled *Addressing conspiracy theories through education*¹⁶⁵ took place in Brussels. The symposium, organised by UNESCO in cooperation with the European Commission and the European Jewish Congress, presented the document *Addressing conspiracy theories: what should teachers know?*.¹⁶⁶ The document is based on the conclusions of the *Conspiracy Theory Handbook*,¹⁶⁷ on the *#ThinkBeforeSharing*¹⁶⁸ campaign and other activities that UNESCO has implemented in

¹⁶⁸ The covid-19 pandemic caused a lengthy global crisis, which resulted in a massive rise in conspiracy theories. In reaction to that, in August 2020, UNESCO together with

the areas of raising media and information literacy, violent extremism prevention, combatting hate crimes and eliminating antisemitism. Nicola Beer, Chair of the *European Parliament Working Group on antisemitism* and also the *European Parliament's* special envoy on combating religious discrimination, told the symposium: *"Conspiracy theories have often served and are still serving as motivation and justification to commit hateful crimes or to exert violence towards human beings. The most horrible conspiracy theory with devastating consequences became the ideology of Nazi-Germany and led directly to the Holocaust. (...) In Europe, in addition to religiously motivated anti-semitism, Jews have been targeted by conspiracy theories for centuries. Being falsely blamed for diseases, economic crisis, and wars. Throughout history, antisemitism is closely and inextricably linked to conspiracy theories. It is fueled by them. You can't think the one without the other. And today, in the 21st century? Today, unfortunately, conspiracy theories and anti-Semitic narratives are on the rise again. They flourish in the context of the COVID-19 pandemic as well as in Putin's brutal war against Ukraine."*¹⁶⁹

On 3 November, the European Union Agency for Fundamental Rights (FRA) published its annual update of the report *Antisemitism. Overview of Antisemitic Incidents Recorded in the EU in 2011–2021*.¹⁷⁰ The analysis of data collected by the FRA proves repeatedly that hate crimes, including antisemitic ones, are underreported. FRA highlights that insufficient doc-

the European Commission, the Twitter social network and the World Jewish Congress launched a European campaign titled *#ThinkBeforeSharing* with the aim to raise media and information literacy of internet users. By means of intensively disseminated banners and other graphic materials, the campaign warned against the danger and consequences of conspiracy theories in relation to the pandemic development. umentation, combined with low reporting rates, contributes to a significant underestimation of the extent and character of antisemitism in the EU. As a result, it is difficult to assess the effectiveness of existing measures combatting antisemitism and to define more effective measures at local, national and international levels. It is not possible to compare the existing available data between countries, as they are collected using different methods and from different sources.¹⁷¹ In its concluding remarks,¹⁷² FRA states that despite the efforts of the EU and its member states, antisemitism remains a serious problem that needs to be systematically addressed through joint efforts by the government and civic society. When it comes to combating phenomena as complex as antisemitism, it is essential to have reliable and adequate data to serve as the basis for follow-up steps. Sustained efforts are therefore needed at national and international levels to improve the recording of antisemitic incidents and other forms of hatred and prejudice, so that EU member states can combat them more effectively.

On 6–7 December, the *European Commission* held the third meeting of the *Working Group on the Implementation of the EU Strategy on combatting antisemitism and fostering Jewish Life* in The Hague. The main topics of the meeting, also based on the conclusions of the FRA report, were the fight against online antisemitism and the development of national strategies in respective member states.¹⁷³

5 | CATEGORIES OF ANTISEMITIC INCIDENTS

This chapter is the central part of the present AR and it deals directly with the manifestations of antisemitism recorded by the FJC in 2022. A total of 2,277 incidents were recorded, which are categorised below. Each category is prefaced by a brief definition and then includes illustrative examples of incidents that fall within it. The categories, distinguished by type, target, ideology, content and medium, always contain and categorise all incidents recorded in 2022. If an incident could be classified into more than one category because it contains, for example, both vulgar and stereotypical claims and Holocaust denial or new antisemitism, only one category, the dominant one, is selected and the incident is placed in that category.

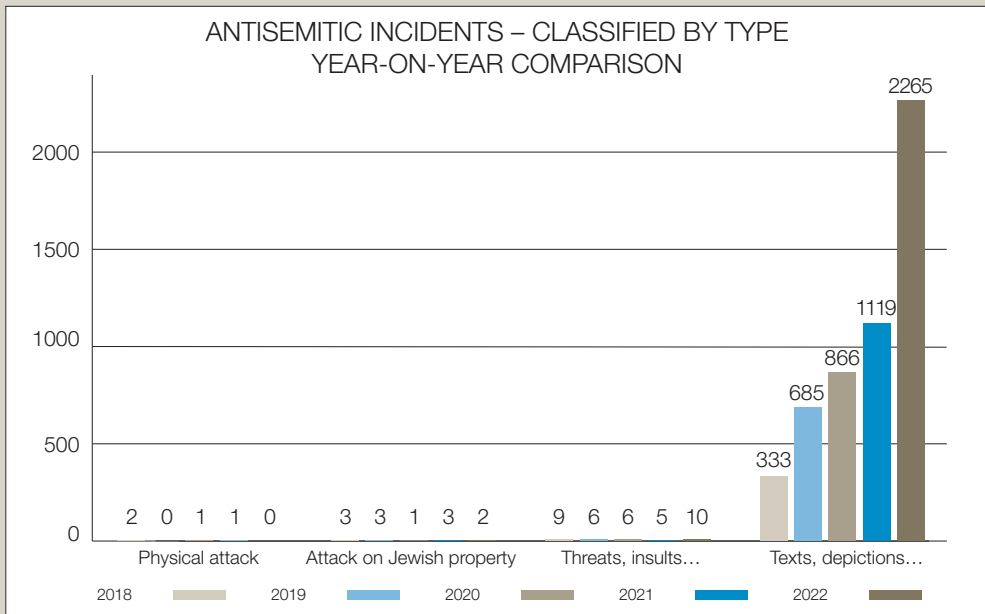

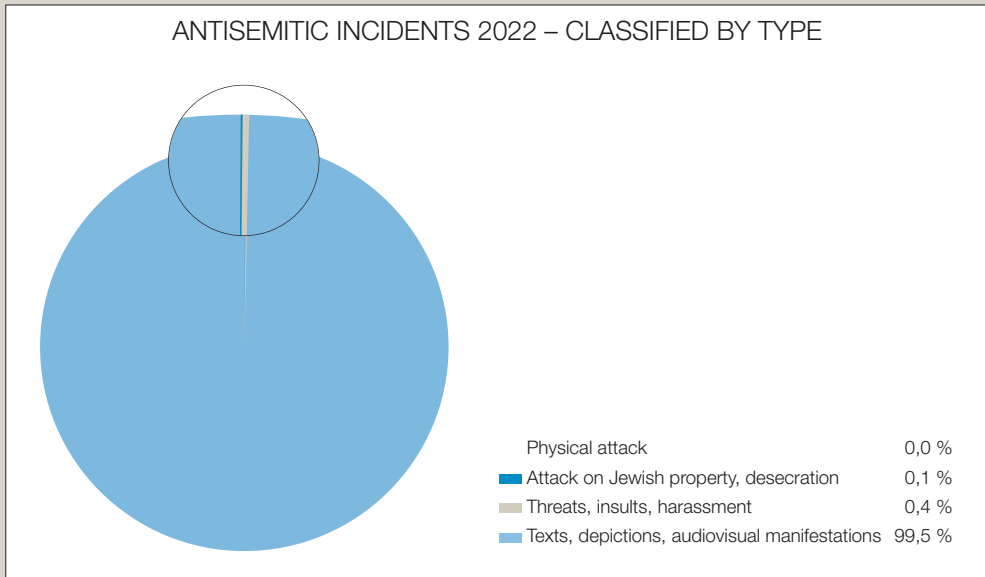

5.1 | BY TYPE

5.1.1 | PHYSICAL ATTACK ON PERSONS

A physical attack on a person is one which results in actual bodily harm or one where the aim is to cause bodily harm even if the victim of the assault manages to escaping or if, for any reason, bodily harm, though intended, does not occur.

5.1.1.1 | Incidents in 2022

In 2022, the FJC did not record any physical attack on a person. During the two preceding years, one attack was recorded; in 2019, no attack was registered and; in 2018, two physical attacks were documented.

5.1.2 | ATTACK ON JEWISH PROPERTY, DESECRATION

An attack on Jewish property or property perceived as being linked to Jews is obviously an antisemitically motivated incident committed with the aim to deface the property symbolically with antisemitic texts, symbols, etc. The cases include the destruction of Jewish cemeteries, memorials, drawing Nazi symbols on Jewish buildings, etc.

5.1.2.1 | Incidents in 2022

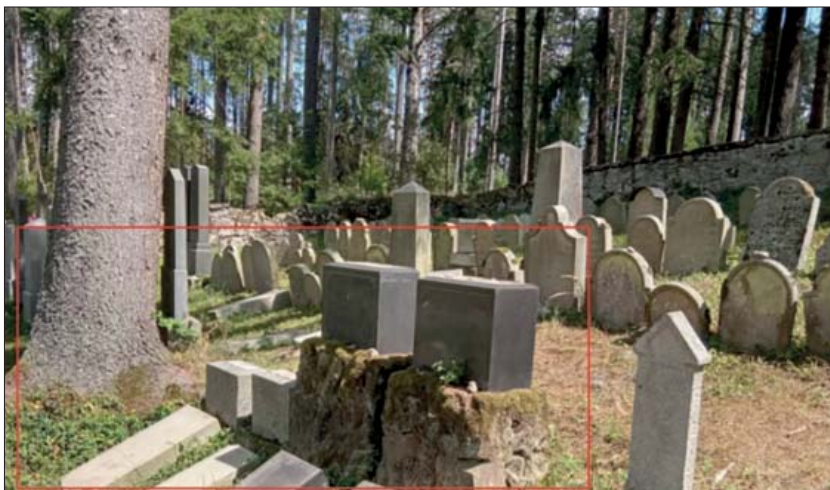

In 2022, two cases of vandalism on Jewish, or Israeli buildings, were recorded. The long-term trend in this domain is more or less stable, in 2018, 2019 and 2021, only 3 attacks on Jewish property were recorded. The lowest number, i.e. one incident, was documented in 2020.

September (Brno) – An unknown perpetrator poured an unspecified liquid on *stones of the ones who disappeared* in the city centre. Some of the stones were laid into the pavement during the Jewish culture festival Štetl Fest, only few days before the incident.

September 2021 – June 2022 (Markvarec, Jindřichův Hradec Region) – An unknown perpetrator entered a freely accessible Jewish cemetery without using violence on an unknown date between 15 September 2021 and 6 July 2022, and damaged eight tombstones. On site, the vandal knocked down some of the tombstones, breaking them off the stone base.¹⁷⁴

5.1.3 | THREATS, INSULTS, HARASSMENT

This category of antisemitic incidents covers any written or verbal threatening addressed to the Jewish community or individuals from among the Jews, as well as to those considered to be Jews, and expressed in person, on the phone, in an e-mail or ordinary mail. An utterance or written text is considered a threat if a concrete individual is threatened with a violent act because of their, even only presumed, Jewishness. Utterances not containing a threat of further violence are recorded as harassment or insults.

5.1.3.1 | Incidents in 2022

10 incidents were recorded in 2022. It is the highest number of incidents since 2018. In comparison with 2021, the number of recorded cases of threatening, insults or harassment doubled. This category comprises for example the following incidents:

February (Prague) – Verbal aggression targeted at an orthodox Jew in the proximity to the Pinkas Synagogue. A passenger of a passing car shouted aloud at the person “*JUDE!*”.

April (Kroměříž Region) – verbal aggression of a restaurant guest. The aggressed person was also threatened with murder and labelled “*a dirty Jew*”.

5.1.4 | TEXTS, DEPICTIONS, AUDIOVISUAL MANIFESTATIONS

This category covers public manifestations of antisemitism not addressed to a specific person, institution or Jewish premise. It thus includes publicly pronounced speeches, antisemitic graffiti, videos, images, articles, comments and other texts. The resulting number of recorded antisemitic texts has probably been distorted due to the possibility of posting them on closed platforms, locked and non-public profiles on social networks, etc.

5.1.4.1 | Incidents in 2022

In 2022, 2,265 incidents of this kind were recorded, that is a total of 99.5% of all registered manifestations of antisemitism. Due to the limited length of this report, only a representative fraction of the recorded cases is given for illustration.

January (Olomouc Region) – text “*ČTI PROTOKOLY SIONSKÝCH MUDRCŮ*” (“*READ THE PROTOCOLS OF THE ELDERS OF ZION*”) written on the bridge on D35 motorway, referring to a fabricated document with an alleged plan of the Jewish people to achieve global supremacy.¹⁷⁵ The text was removed from the bridge in July 2022.

¹⁷⁵ *The Protocols of the Elders of Zion* are generally considered as the starting point of contemporary literature of conspiracy theories and equally played an important role in the Nazi justification of Jewish genocide during the Holocaust: https://cs.wikipedia.org/wiki/Protokoly_sionsk%C3%BDch_mudrc%C5%AF

Pochopte a uložte si to ve své mysli. Domovinou chazarských Židů je Ukrajina a ne Izrael, který patří Aramejcům a Palestincům.

Vše ukradené a okradené !!

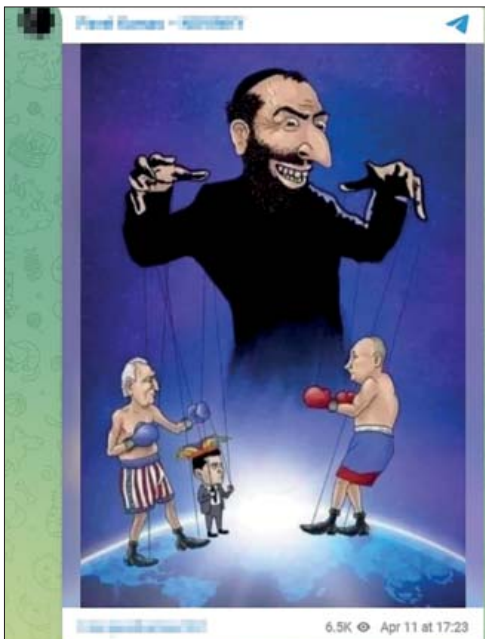

For you to understand and to save it in your mind. The homeland of Khazarian Jews is Ukraine and not Israel, which belongs to the Aramaeans and Palestinians.

Everything stolen and ripped off!!

Moreover, can we be surprised that the Russians won the war with the help of Communism and that their power is growing at the expense of their trusting dummies, degenerate Aryans of the West, which have, for many decades, been obedient servants of the Jews?”

May (Prague) – Verbal aggression in the proximity of the Klaus Synagogue. An employee of Pražské služby a.s. [Prague municipal services in charge of waste and cleaning] collecting waste aggressively pronounced towards the synagogue: *“bloody Jews throw away here [unintelligible]”*.

K čemu velké demonstrace na Václaváku, když nesvrhnou vládu?

Máme za sebou další velkou demonstraci na Václaváku pro svržení současné Fialovy vlády, proti válce, vysokým cenám, liberální neomarxistické totalitě, proti EU a NATO, atd.. Ale co konkrétního tyto demonstrace přinesly, jaký je konkrétní výsledek? Žádný! Prostě neomarxistické debily ve vládě nesvrhnete tímto způsobem. Kdyby to šlo, tak přijede z celé republiky na Václavák daleko více lidí demonstrovat. Kolik zde máme inteligentních lidí, kteří vystupovali i jako řečníci na tribuně a nakonec se jim ze zákulisí vlády opět arogantně vysmějí takové loutky Bruselu a USA jako je Fiala, Rakušan a spol.. Ještě provokují lidi takovými poznámkami a výsměchem! To by musel být skutečný státní převrat, aby k tomu došlo, k volbám by konečně muselo začít chodit daleko více populace a muselo by volit takové strany jako je SPD(které nechtějí válku a financování války z našich daní, nechtějí drahá paliva a ceny, nechtějí neomarxistickou totalitu Bruselu a USA, a proto vyžadují vystoupení z EU a NATO, atd..) a žádné slepeniny. Možná se lidé také nechávají oblbovat takovými řečníky, kteří chtějí do politiky a naoko jsou jakoby pro lidi a dělníky (např. Středula za ODS), ale pamatujte na to, co se píše v Protokolech sionských mudrců. Tam se píše, že pro zmatení mas a udržení celosvětové židovské vlády budou vystupovat na demonstracích nebo budou řídit revoluce ve jménu lidu naoko proti vládám řízeným mezinárodním židovstvem takoví lidé jako je Středula. Ale ve skutečnosti to budou agenti mezinárodních loutkovodců.

What use are big demonstrations on Wenceslas Square, if they do not overthrow the government?

(...)

But what are the concrete outcomes of these demonstrations, what did they bring? Nothing! Perhaps people also let themselves be brainwashed by such speakers who want to enter the political scene and pretend to represent ordinary people and workers (e.g. Středula from ODS – Civic Democratic Party) but let's recall what is written in the Protocols of the Elders of Zion. The text says that to confuse the masses and to maintain the global Jewish supremacy, people such as Středula will appear on demonstrations or be in the lead of revolutions in the name of the people and pretending they are against the governments managed by international Jewry. But in reality, they will be agents of international "puppet" managers.

5.2 | BY TARGET

As a follow-up to the categories described in the preceding AR chapter, we discern targeted and general antisemitic incidents.

5.2.1 | TARGETED

Targeted incidents are those which were addressed towards a specific person or institution, or attacks on Jewish property, or property which is perceived as associated with the Jews, with the aim to symbolically devalue the property with antisemitic texts, symbols, etc.

5.2.1.1 | Incidents in 2022

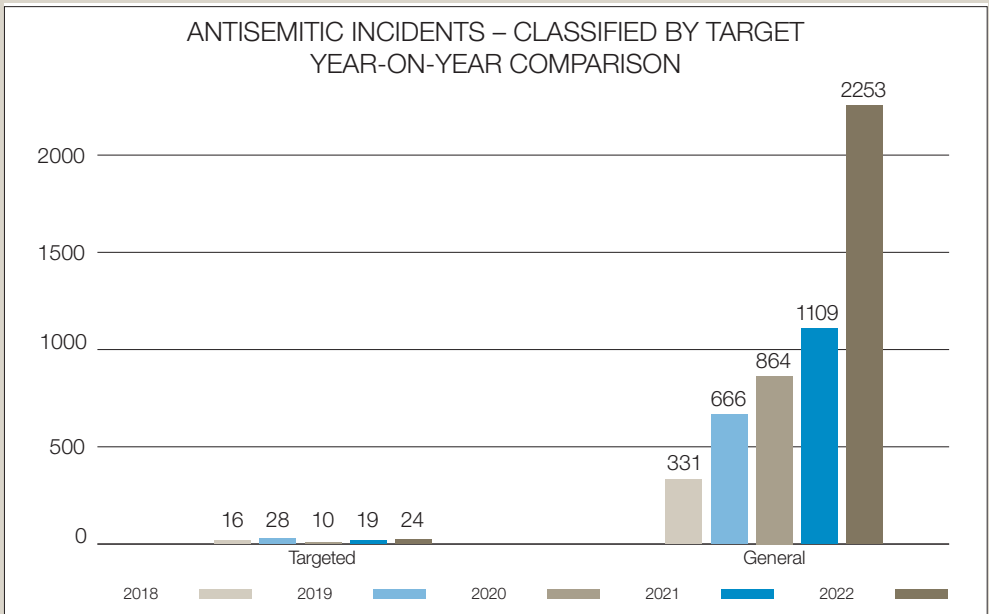

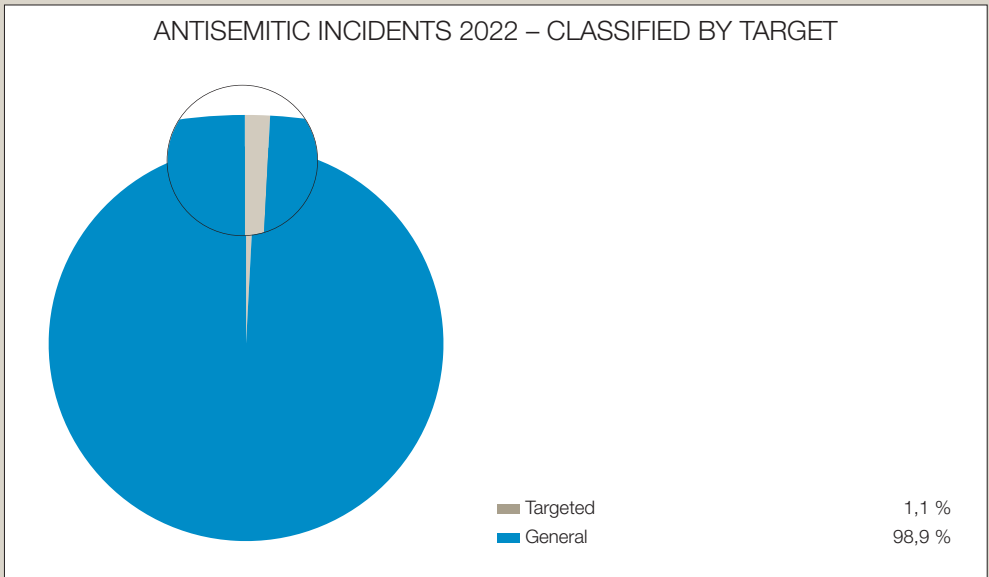

In 2022, 24 targeted incidents with antisemitic motivation were recorded. Again, we can affirm that the dramatic rise in the total number of antisemitic incidents did not considerably affect this category. It also holds true that this type of antisemitic incidents are marginal in CR. In 2021, 19 targeted incidents were documented, in 2020, they were 10.

5.2.2 | GENERAL

This category comprises all incidents without a specific target to damage or harm.

5.2.2.1 | Incidents in 2022

In 2022, 2,253 of generally targeted incidents were recorded, i.e. almost 99% of all recorded manifestations of antisemitism. From year-on-year comparison, it is obvious that the number of general incidents is considerably on the rise in the long term, directly proportionally to the total number of all incidents.

5.3 | BY IDEOLOGY

A typical feature of antisemitism is that it is not connected only with one ideology but that it can come from all sides of the political and social spectrum from the far right and far left to the supporters of ultraconservative

ANTISEMITIC INCIDENTS 2022 – CLASSIFIED BY IDEOLOGY

ANTISEMITIC INCIDENTS – CLASSIFIED BY IDEOLOGY
YEAR-ON-YEAR COMPARISON

Christian fundamentalism and radical Islamism. Disinformation platforms, often pro-Kremlin oriented, also form a significant ideological base for antisemitic texts in CR. It is possible to determine the origin of an antisemitic incident only if it appears on a clearly classifiable medium, or if the author or attacker claims allegiance to an ideology or religious extremism from his own initiative, and it is thus evident that the person was motivated and influenced in his or her extremist stance. All other incidents whose ideological origin cannot be determined are classified in the category Unclassified (sub-chapter 5.3.6.).

5.3.1 | THE FAR RIGHT

Incidents that fall into this category have occurred on platforms associated with the far right, i.e. parties, associations, groups, group initiatives, or persons expressing nationalistic, racial or ethnic hatred, often also speaking out against immigrants or the Roma. Most of them are nationalists, while some also express sympathy for fascism and Nazism. Antisemitic incidents coming from the far right are most often based on classic antisemitic stereotypes with a strong element of conspiracy thinking, possibly Holocaust denial.

5.3.1.1 | Incidents in 2022

In 2022, 798 such incidents were registered. They represent 35.1%, i.e. more than a third of the total number of records, which the AR analyses. When comparing the situation to the situation in the preceding years, several key findings can be formulated below:

- a) The manifestations of antisemitism from the far right ideological positions are still on the rise and leapfrog.

- b) Social networks have been a stable and dominant communication tool which adherents of the far right use to spread antisemitic invectives and general manifestations of hatred (see section 5.5.5.4. Social networks).
- c) Despite a significant upheaval of manifestations of antisemitism on disinformation platforms (see more in section 5.3.5. Disinformation platforms) it still holds true that from the ideological perspective far right antisemitism represents the most numerous category.

“Even political parties stigmatised as “extremist”, such as the ND [National Democracy] party, which is called “antisemitic”, and DSSS [Workers’ Party of Social Justice] party, named “neo-Nazi”, began to fight against the stupid, pseudopolitical banality. Such political parties should be aware that within the next few decades, they will not win any elections, that the Zionists will leave them outside the social life, where they pushed them using toxic propaganda and repressive measures, which is their punishment for their independent thinking. The role of these parties is to be a sort of fermentation medium in society, to explain their political programme to people and a political alternative to liberalism.”

5.3.2 | THE FAR LEFT

This category includes incidents coming from the far left platforms, which is, from the point of view of ideological starting points of antisemitic attitudes in Czech environment, associated especially with orthodox Communism, the anarchistic movement and activist organisations linked to the BDS movement. Content-wise, it is dominated by new antisemitism in the form of illegitimate criticism of the State of Israel.

5.3.2.1 | Incidents in 2022

In 2022, the FJC recorded 88 incidents. From the ideological positions of the far left, it is historically the highest number of cases. The rise, as compared to the preceding period, has almost doubled and copies the total increase of the number of the recorded data.

January – a demonizing article on the web site of the Communist Youth Association [Komunistický svaz mládeže]:¹⁸⁹

“The global rage against Israel has intensified in 2021 when it began another one of the regular military offensives against the Gaza Strip, an almost defenceless Palestinian population centre, which was rightfully labelled the biggest open-air prison in the world.”

February – a declaration of the Anarchistic federation on the invasion of the Russian Army in Ukraine, containing elements of new antisemitism:¹⁹⁰

“If we condemn Russia for the invasion in Ukraine, we must also condemn Turkey for invading the self-governed territory of Rojava in Northern Syria and for its cooperation with armed people of the Islamic state; we must condemn Israel for the occupation of Palestinian territories and for the apartheid policy; we must condemn China for persecuting the Uyghur people, etc.”

The image shows a screenshot of a Facebook post. The main post is in a light blue bubble and contains the following text:

Jednalo se o teroristické komando, které bylo evidentně na cestě k provedení dalšího teroristického úroku. Izraelská policie je sledovala. Komando začalo střílet první, v přestřelce byli teroristé zabití. V jejich vozidle se našly útočné pušky, granáty a "závět" jednoho z nich, podepsaná jménem Islámského džihádu, ve které stálo, že úroky proti Izraeli musí pokračovat. Tolik k těm "nevinným popraveným" Palestincům.

Terorismus a to každodenní, ~~garni~~ teror, je APARTHEID, vojenská okupace a kolonizace. Ozbrojený odpor namířený proti ozbrojeným složkám okupanta, je legitimní i v rámci mezinárodního práva. Ale samozřejmě teror plodí teror. Proto je dobré si připomenout, že první teroristické organizace na území Palestiny byly ty sionistické a v r. 1948 pak zformovaly izraelskou armádu.

Below the reply, there is a filter icon and the text: "5 t"

It was a terrorist commando which was clearly about to do another terrorist attack. The Israeli police tracked them. The commando began to shoot as the first, the terrorists were shot during the gunfight. Offensive rifles, grenades and "the last will" of one of them, signed in the name of Islamic jihad, stating that attacks against Israel must go on, was found in their car.
This is what the "innocent beheaded" Palestinians are like.

Terrorism, on everyday basis, is APARTHEID, military occupation and colonisation. An armed resistance directed towards armed units of the occupier is legitimate also within international law. But of course terror brings only more terror. That's why it's important to recall that the first terrorist organisations on Palestinian territory were the Zionist ones, which formed the Israeli army in 1948.

May – a statement demonizing the State of Israel in electronic periodical Levicoviny¹⁹¹ issued in May:

“If the genocide of (one part of) its own population under the baton of Pol Pot or the Chinese regime officials is rightfully criticised, why the same crimes of Pinochet or Israeli apartheid regime, not only on Palestinian occupied lands, do not matter?”

June – demonization of the State of Israel in an article on Blisty.cz:¹⁹²

“What is happening in Masafer Yatta is not only the largest-scale ethnic purge which Israel has done since 1967, but this step has to be considered as the first step in the more extensive plan of illicit land expropriation, ethnic purges and official mass annexation.”

July – an article on Nasepravda.cz, containing e.g. the following statement:¹⁹³

5.3.3 | ISLAMISM

This category comprises incidents based on ideological positions of Islamic extremism. Because the local muslim community is moderate (and marginal), this category is also rather marginal. Among antisemitic incidents are predominantly represented strongly hostile statements with demonization or delegitimization features of the State of Israel.

5.3.3.1 | Incidents in 2022

In this category, there have only been a few incidents, like in the preceding periods monitored. In 2022, we could see a significant fluctuation with a total number of 44 recorded incidents (against seven incidents in 2021, none in 2020, one in 2019 and three in 2018). In this context, however, we must mention that it does not reflect the global atmosphere in Czech Muslim community, but it is a result of the activity of several profiles on social networks, which were not among the sources tracked in the preceding periods. All incidents in this category come from the virtual environment and about 30% of incidents were documented in May 2022, when the domestic and international scene resonated with the death and funeral of Shireen Abu Akleh.¹⁹⁶

Ukrajinský prezident V. Zelenskyy ve světě lobbuje o pomoc pro svou válčící zemi. Navštívil kromě dalších zemí i Izrael. Již jeho dřívější postoje byly protipalestinské a nepokrytě stranily sionistickému apartheidnímu režimu. Nyní ho palestinský politolog Asad Ghanem v otevřeném dopise vyzývá, aby ve světle nových událostí změnil svůj názor a stal se objektivním. Boj proti okupaci zůstává bojem proti okupaci, ať už vzdoruje Ukrajina Putinovu režimu, anebo Palestina sionistům.

The Ukrainian President V. Zelenskyy lobbies around the world for aid for his country at war. Besides other countries, he visited Israel. Already his earlier stances were anti-Palestinian and hypocritically favouring the Zionist apartheid regime. Now the Palestinian politologue Asad Ghanem asks him in an open letter to change his opinion in light of new events and to become objective. A fight against occupation remains a fight against occupation, whether it is Ukraine opposing Putin's regime or Palestine opposing the Zionists.

Ja nevím čeho se bojíte a proč nerikate celou pravdu, zraneno bylo více jak 450 lidí a zastřeleno 5 lidí, a nepravem začeno bez zadného obvinení kolem 500 lidí, a muzou se obratit na Aljazeera, která je nejlepší sdělovací prostředek vsude a hlavne dnes na Ukrajině, kde ukazují vse co se tam dějí...pravdivě.. a nikoliv jako sionistické sdělovací prostředky, které ovládají EU a hlavne bývalé SSSR státy a které mlčí často když Izrael vraždí, a mluví jenom když kazdy čas nějaký zoufalý Palestinec reaguje ...

We believe the question should rather be addressed to the Arab news portal, which is about as trustworthy as Al Jazeera though.

I don't know what you are afraid of and why you don't tell the whole truth, more than 450 people were injured and 5 people shot death, and about 500 people illicitly arrested without any allegation, they can turn to Aljazeera which is the best media around the world, especially today in Ukraine, they show everything that happens there... truthfully... unlike Zionist media influenced by the EU and especially former USSR countries and which are silent even when Israel kills and speak out only every time some desperate Palestinian reacts...

5.3.4 | ULTRACONSERVATIVE CHRISTIAN FUNDAMENTALISM

Incidents coming from the Ultraconservative Christian fundamentalists should be perceived as private initiatives, often in conflict with the conclusions of the Second Vatican Council, which radically diverge from the official stances of the Catholic church and other Christian denominations, which cannot be associated with antisemitism. Content-wise the incidents from this category are often full of myths and stereotypical claims coming from religion-motivated hatred or conspiracy theories.

5.3.4.1 | Incidents in 2022

A dramatic year-on-year rise in the number of antisemitic incidents is noticeable also in this category. A total of 35 cases were documented, all coming from the virtual environment. In comparison with the previously monitored period, it is a more than 100% increase, in comparison with 2018, the increase is almost quintuple. With respect to the fact that the platforms of Ultraconservative Christian fundamentalists also share various disinformation and conspiracy theories, the finding for this category for 2022 corresponds to the findings formulated in section 5.3.5. Disinformation platforms.

Skrytá tyranie v Čechách

v současné době působí na území České republiky kompletně skrytá vraždicí židovská sionistická klika, která také tahá za nitky a zcela řídí zdejší režim a veškeré procesy v Čechách.

Mají instalované své **VORY V ZAKONE**, mezi ty nejvýznamnější patří následující židé:

Pavel Rychetský, Igor Stríž, Lenka Bradáčová, Radim Dragoun, Václav Kučera, Martin Staněk, Jan Lelek, Martin Suska, Roman Balej, Ondřej Šrámek, Radka Míchková, Ondřej Němec, Jakub Grmela, Štěpánka Láznová, Zdeňka Galková, Ondřej Načeradský, Ivo Poštolka, Petr Sedlář, Martin Dostál a mnoho dalších židů ... Jedná se asi o sto osob, kteří se podílejí na tomto protitátním spiknutí a v podstatě světočně řídí Českou republiku. Faktické odpůrce jejich ilegálního režimu nemilosrdně vraždí, zneužívají při tom infrastrukturu státu Izrael, zejména tajnou službu MOSSAD. Více běží jejich vyzkoušenou, ověřenou a na světě mnohokrát opakovanou metodou komplotů, spiknutí a terorů popsanou v dokumentech:

Hidden tyranny in Czechia

Currently, there is a completely hidden murderous Jewish Zionist cabal, which also pulls the strings and totally directs the local regime and all processes in Czechia. They have installed their Russian mafia bosses, to name the most prominent ones, Jews:

Pavel Rychetský, Igor Stříž, Lenka Bradáčová, Radim Dragoun, Václav Kučera, Martin Staněk, Jak Lelek, Martin Suska, Roman Balej, Ondřej Štastný, Radka Michková, Ondřej Němec, Jakub Grmela, Štěpánka Láznová, Zdeňka Galková, Ondřej Načeradský Ivo Poštołka, Petr Sedlařík, Martin Dostál, and many more Jews... They are about a hundred of people who take part in the anti-national conspiracy and in fact wilfully manage the Czech Republic. They unmercifully murder their factual adversaries while using the infrastructure of the State of Israel, especially MOSSAD secret service. Everything runs perfectly with their tested-out, verified and globally oft-repeated method consisting in plot, conspiracy and terror, as described in the documentaries below:

The annihilation of Slavic nations was organised by the Jews – the same Jews govern in Czechia today – they hastily murder the entire Czech families

What the Jews did to the Germans - is the same they are doing to the Czechs – that's the same that they are doing everywhere around the world to every occupied nation

Bobby Fischer – a few words on THE JEWS – he told the truth about the Jews – and that turned out to be fatal to him – Jews are anti-social, evil, destructive, murderous, treacherous parasites...

5.3.5 | DISINFORMATION PLATFORMS

A separate category is formed by incidents coming from disinformation media, web sites or social networks connected to them. These platforms are often presented as alternative news media; the published articles may be based on facts, so they gain false credibility but at the same time they also contain a made-up or distorted part. On these platforms, antisemitic incidents penetrated with conspiracy theories and new antisemitism prevail.²⁰²

5.3.5.1 | Incidents in 2022

558 antisemitic incidents on disinformation platforms were documented. Compared to the four preceding periods, their number has risen by more than 200%. Due to increasing activity and popularity of disinformation media, it is not a surprising but still an extremely disturbing finding. The in-

²⁰¹ <https://rexcz.blogspot.com/2022/10/komentar-eleison-dccxcvi-provinili.html>

²⁰² When identifying individual sources of disinformation, the AR draws especially on databases of the Endowment Fund of Independent Journalism: <https://www.nfnz.cz/domaci-konspiracni-servery/>, of the NELEŽ project: <https://www.nelez.cz/> and the Čestí elfové [Czech Elfs] project: <https://cesti-elfove.cz/>.

crease has also affected the percentage representation of the ratio between each sub-category within incidents' classification from the ideological point of view. While in 2021, 14.4% of all registered incidents came from disinformation platforms, in 2022, these platforms published 24.5% of registered manifestations of antisemitism.

Among the most active online channels which produced content fulfilling the criteria of an antisemitic incident according to the IHRA definition during 2022, were Ceskavec.com, Aeronet.news, Infokuryr.cz and Cz24.news, and the associated profiles on social networks.

February – a conspiracy theory on the Aeronet.cz²⁰⁴ disinformation web site:

“The occult processes of the Mah’ral control over Prague, and the occult processes of the Grand Lodge over Vienna, are based on the historical fact that business has always been conducted in the largest cities. The centres of occult management processes were therefore concentrated in Prague and Vienna. Subsequently, these Jewish families united with the Goyim, but if the union

was through the maternal line, then these occult management processes were preserved. Therefore, after 1989, all power over the Czech Republic was seized by families of Jewish and, if we go deep into history, also Khazarian origin, as was, after all, best documented by Miroslav Dolejší, an expert on the Judeo-Masonic management processes in pre- and post-November Czechoslovakia.”

March – a Czech translation of a conspiracy article with antisemitic overtones, published in quasi-media web site Infokuryr.cz:²⁰⁵

For hundreds of years, the Kabbalah has been working on destroying the Slavic world, specifically to wipe Russia off the world map. For decades, the West has been doing nothing else than teasing the bear in its den and trying to lure it out of the woods so that it can then point the finger at the angry bear as the aggressor and thereby justify its subsequent devastating blow.”

Yes, that’s right, a united goyim is our greatest enemy, that’s why we have deployed against you for our defence all these meritorious and faithful buddies like witovská, taber, železný-eisenkraft, fendrych and others. We follow faithfully the protocols of our greatest men from the chosen ethnic group. We have figured it out with you goyim.

The Protocols of the Elders of the Zion:

“To dominate public opinion, we especially have to shock the masses by showing totally contradictory opinions so long until non-Jews will get totally lost in this labyrinth and come to the conclusion that the best solution is not to adhere to any political party at all. The people does not need to understand political issues at all, it is up to the one who governs. That’s the first secret.

The second secret necessary for the success of our government is to multiply and support mistakes, passion and confusion, and to decompose social rules up to the point that no one can manage this chaos and that people cannot agree with one another. This policy will let us disseminate conflicts from all sides, disintegrate collective powers which do not want to subjugate as yet, and especially to get rid of courage every individual creative power which would be able to destroy our masterpiece.”

5.3.6 | UNCLASSIFIED

This category includes incidents for which it is not possible to determine their ideological underpinning and therefore cannot be placed in any of the categories above. Incidents in this category have been on the rise in the long term. Especially on social networks or in discussions on news servers, isolated antisemitic incidents are becoming more and more frequent among contributors who do not show long-term activity in terms of antisemitic stances. These incidents often take the form of the vulgar names “Kike/Kikes” or phrases such as “typical/classic kikery”, etc., but their content covers the entire spectrum of manifestations of antisemitism.

Ano, Izraelští židé se vždy snažil vyrazit z každého konfliktu maximum zisku, nejlépe i v penězích, pro sebe, bez ohledu na miliony mrtvých, často i vlastních lidí...

Vlastně stejně jako rusáci... Ta povaha je úplně stejná...

Takže se není čemu divit...

Zelenskij na ně bude muset výrazně více přitlačit...

Yes, Israeli Jews have always tried to get the maximum profit out of every conflict, money if possible, for themselves, without taking into considerations millions of death, often among their own people...

Actually, just like the Russians...the character is totally the same...

So it's no surprise...

Zelenskij will have to put much more pressure on them...

Židovství chazarské i to chasidské, to bylo v dávné historii spíše něco jako životní styl. Takový nosatý motorkářský (peněžní, lichvářský) gang 😂

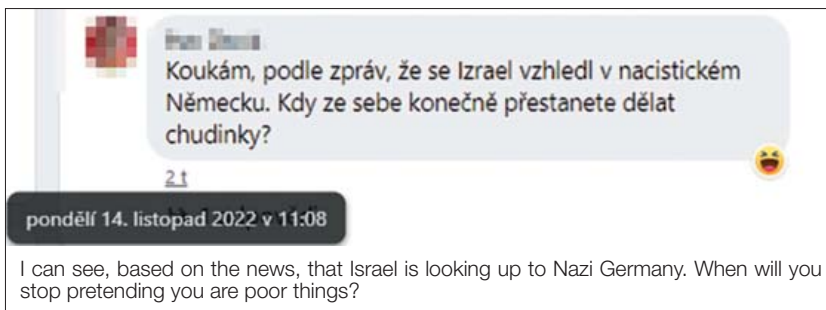

Zato položidi sionisti, to jsou ti fašisti s korporatů, pro které se vedou všechny tyto války!

I don't mind a Jew, but I mind a Zionist!

Khazarian and Hasidic Jewishness was deep in the past something more like a life style. A sort of bike (money, usury) gang with funny noses

But half-Jews Zionists, they are fascists from corporate companies, for whom all these wars are made!

5.4 | BY CONTENT

Classification by content is directly based on the working definition of antisemitism mentioned in sub-chapter 2.3. Hatred towards the Jews, their institutions or religious communities takes many forms and is often a combination of more types of manifestation. Often it would be possible then to classify each incident by content into more categories, as e.g. a vulgar claim can be accompanied by physical aggression or threatening. In such cases, only one content category is selected, the one which prevails in the incident, and that's the one into which the incident is classified.

5.4.1 | PHYSICAL AGGRESSION

This category comprises acts of physical aggression, whose examples are at the same time given in sub-chapter 5.1.1. Physical attack on persons, or in sub-chapter 5.1.2. Attack on Jewish property, desecration.

5.4.1.1 | Incidents in 2022

In 2022, two cases of physical aggression were recorded.

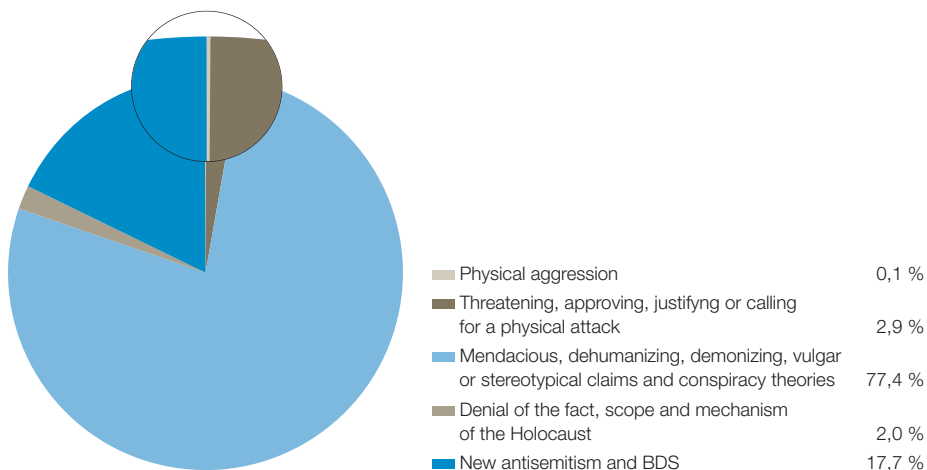

5.4.2 | THREATENING, APPROVING, JUSTIFYING OR CALLING FOR A PHYSICAL ATTACK

This category comprises threatening, or justifying killing or harming the Jews in the name of radical ideologies or extremist opinions.

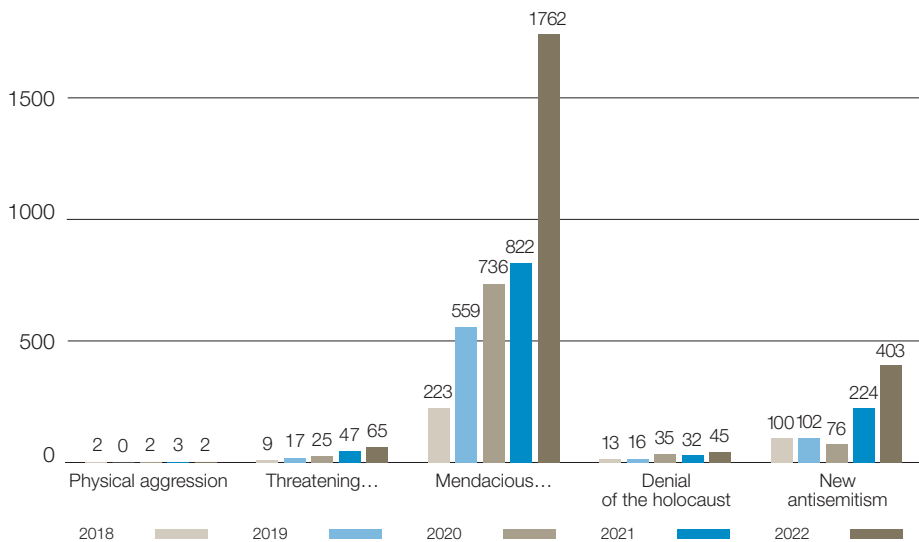

5.4.2.1 | Incidents in 2022

In 2022, 65 of such manifestations of antisemitism were recorded. The statement from previously analysed period on year-on-year continual increasing trend in this category remains relevant. In 2021, 47 incidents were recorded, in 2020, they were 25.

ANTISEMITIC INCIDENTS 2022 – CLASSIFIED BY CONTENT

ANTISEMITIC INCIDENTS – CLASSIFIED BY CONTENT YEAR-ON-YEAR COMPARISON

About 44% of cases of threatening, approving, justifying or calling for a physical attack in 2022 came from the supporters of a far right ideology.

5.4.3 | MENDACIOUS, DEHUMANIZING, DEMONIZING, VULGAR OR STEREOTYPICAL CLAIMS AND CONSPIRACY THEORIES

Incidents in which mendacious, dehumanizing, demonizing and stereotypical claims about the Jews as individuals or about the Jews as a collectivity are used. It includes the dissemination of conspiracy theories about the myth of global Jewry, its control of the media, economy, governments and public institutions, and also blaming the Jews from preferring the supposed global Jewry to the interests of the nations whose citizens they are.

5.4.3.1 | Incidents in 2022

In 2022, 1,762 incidents were recorded, i.e. 77.4% of the total number. The findings from last year correspond to the trend of the previously monitored periods, in which most of the manifestations of antisemitism recorded fell into this category.

5.4.4 | DENIAL OF THE FACT, SCOPE AND MECHANISM OF THE HOLOCAUST

The incidents in this category contain the denial of the fact, scope and mechanism of intentional genocide of the Jewish people committed by nationalistic-socialist Germany and by its supporters and co-culprits during World War II. E.g. calling into question the existence of gas chambers, mocking and relativising the number of Jewish victims, or blaming the Jews, individuals and Israel as a Jewish state of making the Holocaust up or of overstating it.

In 2022, 45 incidents were recorded. As compared to 2021, when 32 similar cases were recorded, it is a 40% increase. The dominant platform for publishing statements calling into question the fact, scope and mechanism of the Holocaust were social networks.

The majority of registered cases originated from the part of supporters of the far right ideology and from disinformation platforms.

Přesně.... za druhé světové války židi přes jejich odkoupená media a jejich propagandu pomátli Britům a američanům hlavy, udělali z nacistů krvelačné bestie a přesvědčili je aby opustili své domovy a jeli zničit německo. A co tak hrozného němci provedli? Zavedli zlatý standard, darovali zemědělcům půdu pod podmínkou že ji budou obdělávat a živit německo, stavěli silnice, byty a domy pro rodiny. Děti měli zdarma obědy a školy. Děti se učili kriticky přemýšlet a velký důraz byl kladen na tělovýchovu...

Exactly...during World War II, the Jews brainwashed the Brits and Americans via the media that they had conquered and via their propaganda, they made bloodsheading beasts from the Nazi and persuaded them to leave their homes and to destroy Germany.

Média dnes falšují statistiky, falšuje se to kdo je a kdo není zaočkovaný,... jakýkoliv graf úmrtnosti nebo účinnosti léku je bezvýznamný pokud neznáte metodiku testování! To jsou paradoxy! Židé vyzbrojují nacisty! Kapitalistický svět totálně zdegeneroval.

 Odpovědět

Ale vůbec ne, jen se odložily rukavičky a sňaly masky – nejsou potřeba. Mezinárodní právo už neexistuje, liberální demokraté dělají vše správně, a tak zcela logicky kdokoliv s nimi nesouhlasí, je právě vším, co kohokoliv napadne. **Bohatí zámožší Židé platili i onen holocaust** (i když Slovanů zahynulo mnohem více, a tím nemyslím jen vojenské ztráty, ale v našem případě o holocaust nešlo – inu, nová doba), je Židé, potažmo je state departement, firmy, banky, obchodovaly v době válečného konfliktu 2.WW ve Švýcarech přes speciálně proto založenou banku (existuje dodnes) s nácky jedna radost. Židí jsou od starověku pragmatici, tvrdí pragmatici, v nynější době pod ochranou státu a médií.

Irony! Jews giving weapons to the Nazi! The capitalistic world has totally degenerated.

Not at all, just gloves and masks were taken off – they are not necessary. International law does not exist any more, liberal democrats do everything right, so, logically, whoever disagrees with them is anything one can think of. RICH JEWS FROM OVERSEAS HAVE EVEN PAID THE HOLOCAUST (although many more Slavs died, and I am not talking just about military losses, in our case it wasn't holocaust – you know, new era), it's Jews, or the state department, firms, banks, made business in the times of the war conflict of WW II in Swiss through a specially founded bank(which exists still today) with Nazis just easy as that. Since Anquity, Jews have been pragmatic, the pragmatics say, today under the protection of the state and media.

Co ale smysl nedává, je prudký nárůst počtu Židů u nás po válce. Kde se tu vzalí? Byla to statistická chyba při sčítání obyvatelstva? Nebo snad nějaký nacistický šlendrián a válku přežilo významně víc Židů, než by se dalo očekávat? Nebo došlo k masové imigraci židovského obyvatelstva do ČR po roce 1945? Nebo snad...ještě něco úplně jiného? Odpověď neznám, byť jí možná tuším. **Bohužel současná právní úprava trestního zákona neumožňuje svobodnou diskuzi na tohle zajímavé téma.** Je jen otázkou, co v roce 2000 vedlo poslance ODS Payneho a Marka Bendu (podle alternativních zdrojů prý bylo jméno jeho otce Chaim Afterduft a jeho rodina přišla z Ukrajiny) k prosazení zákona, který de facto zakázal svobodnou diskuzi na téma židovského holocaustu?

NEVER FORGET!

THAT THE EVIL NAZIS CONVERTED SIX GORILLION INNOCENT JEWS INTO TABLE LAMP ACCESSORIES!

No one reasonable can believe in these fairy tales, hopefully...

But what doesn't make sense is the sharp increase of the number of Jews in our country after the war. Where have they come from? Was it statistical mistake arisen during population census? Or some kind of Nazi chaos and there were many more Jewish war survivors than could be expected? Or was there mass immigration of the Jewish population to Czechoslovak Socialist Republic after 1945? Or, what if...something totally different happened? I don't know the answer but I might have an idea. Unfortunately, the current criminal code regulation does not enable free discussion on this interesting topic. The question is what made ODS deputy Payne and Marek Benda in 2000 (according to alternative sources, his father's name was Chaim Afterduft and his family came from Ukraine) to enforce a law which de facto forbid free discussion on the issue of Jewish Holocaust?

5.4.5 | NEW ANTISEMITISM AND BDS

This category includes incidents that deny the Jewish people's right to self-determination; they apply standards of behaviour to Israel that are not applied to other democratic states; or collectively blame Jews for the actions of the State of Israel. These include, for example, claims that the existence of the State of Israel is based on racism or apartheid, comparison of the current actions and policies of the State of Israel to Nazi policies, or comparison of Palestinian refugee camps to concentration camps.

5.4.5.1 | Incidents in 2022

In 2022, the FJC recorded 403 incidents, which represents less than 18% of the total number of incidents in percentage terms. The trend of continuous increase of the number of incidents, which in 2021 was mainly related to the wave of antisemitic reactions to the military conflict between Israel and Hamas and the Palestinian Islamic Jihad (PIJ) in the Gaza Strip in May 2021,²²⁴ continued in the period monitored now. In 2021, 224 incidents were registered, accounting for 19.9% of the total volume of recorded data.

At this point, it is necessary to reiterate that criticism of the State of Israel's policies is not classified as an antisemitic incident, unless it meets the criteria of the IHRA's working definition of antisemitism. Incidents in this category can be observed across the ideological spectrum and on disinformation platforms, but most could not be clearly assigned to a specific ideology in 2022. Approximately half of the manifestations of new anti-semitism in 2022 were captured on social networks of ideologically undefined individuals or groups.

Israeli stance towards Russian invasion is one great disappointment.
Because Jewish apartheid has been doing the same to the Palestinians for dozens of years. They are Nazi.

“The collective West has now fully embraced the strategy first devised by the Israelis: if you can’t win a real war, win an imaginary one. And just as bombing some border post between Syria and Iraq makes no military sense or even any sense at all, it’s great for the morale of Israelis who, like people in the West, feel a strong sense of racial superiority over their Arab neighbours, so they need a “victory” to boost their own egos and cover up the fact that Israel’s neighbours have lost any fear they may have had in the past (...) During World War II, the Nazis used the term “Final Solution”, and that is what Bucha under the false flag signals: the decision of Uncle Shmuel to achieve a “Final Solution” to the “Russian problem”.”

First of all, I would like to recall that allowing the return of Palestinian refugees and entitlement to compensation was already defined in UN Resolution 194 of December 1948, and that the implementation of this resolution was to be a condition for Israel’s admission to the UN. To this date, they have not implemented this resolution, nor any other resolution dealing with land which they have stolen or people which they have expelled. And unfortunately, I strongly doubt that they ever will, because the Israeli concept of “democracy” is about maintaining a Jewish majority, at any cost. No matter how brutal... and even apartheid demands it.”

Zajímavé ovšem je, že se židé v Izraeli chovají úplně stejně k lidem jiného etnika. Jejich slogan, že nelegální teroristický Izrael je jenom pro židy, zní velice rasisticky. Okradaní Palestinci o své území jsou na prvním místě genocidy ze strany židů. A svět se chová jako ty tři opice – nevidím, neslyším, mlčím.

Jinak obavy o chudáky židy nejsou na místě. Ti dnes Německo plně ovládají a kdyby jen Německo.

Interestingly, Jews in Israel treat the people of another ethnic group exactly the same. Their slogan that illegal terrorist Israel is only for Jews sounds very racist. Palestinians that Israelis are stealing land from are in the first ranks of genocide from the part of the Jews. And the world acts as the famous three monkeys – see-no, hear-no, speak-no.

By the way, worrying about poor Jews is not an issue. They govern Germany today and if only it was just Germany.

5.5 | BY THE MEDIUM**5.5.1 | PERSONAL CONFRONTATION AND INTERACTION**

Incidents which were reported or documented by the victims or witnesses and which happened during a direct personal confrontation or interaction. They include physical as well as verbal attacks and threatening, vulgar statements or insults with antisemitic motive.

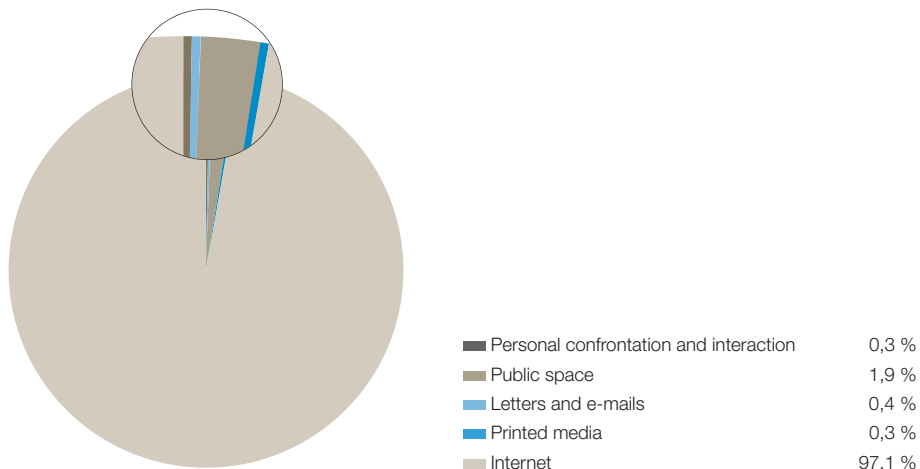

5.5.1.1 | Incidents in 2022

In 2022, 7 antisemitic incidents which took place during a personal confrontation or interaction were recorded. They make 0.3% of the total amount.

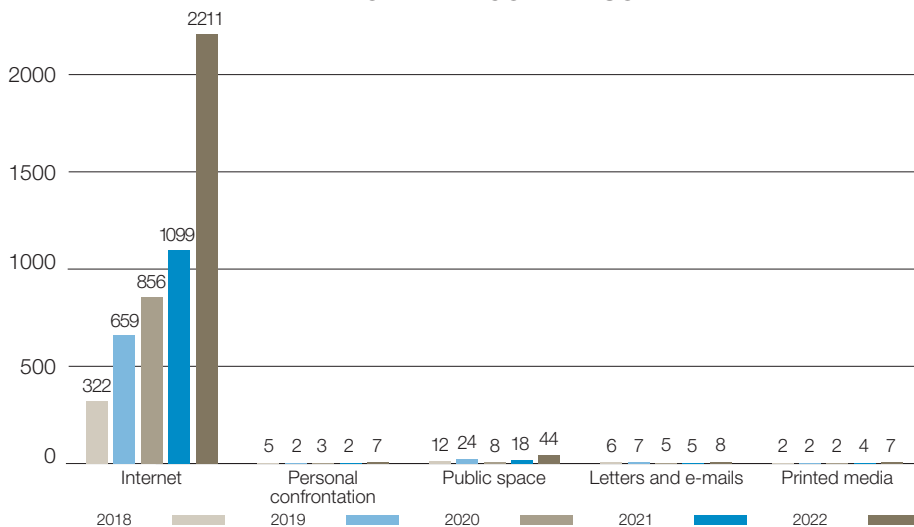

From year-on-year comparison it follows that the increase as compared to years 2021, 2020 and 2019 has multiplied, although there were only a few incidents in this category. During these past periods, two, or three incidents were recorded. Most cases were recorded in 2018 when during a personal confrontation or interaction, 5 manifestations of antisemitism happened.

January – an interview of Andreas Papadopoulos from ČT24 with an investigative reporter Josef Klíma was interrupted by a lorry driver, who shouted vulgar expressions at them. E.g. *“Hey, guys, say hello to the Jews in Czech TV. Ciao.”*²³²

5.5.2 | PUBLIC SPACE

Manifestations of antisemitism which appeared in public space. No direct confrontations with individuals from among the Jewish community or those who are considered Jews have been recorded, but they were targeted at the general public. This category includes e.g. speeches delivered at lectures, during demonstrations or other public gatherings, but also anti-semitic graffiti or records in visitors’ books in buildings associated with the Jewish community.

5.5.2.1 | Incidents in 2022

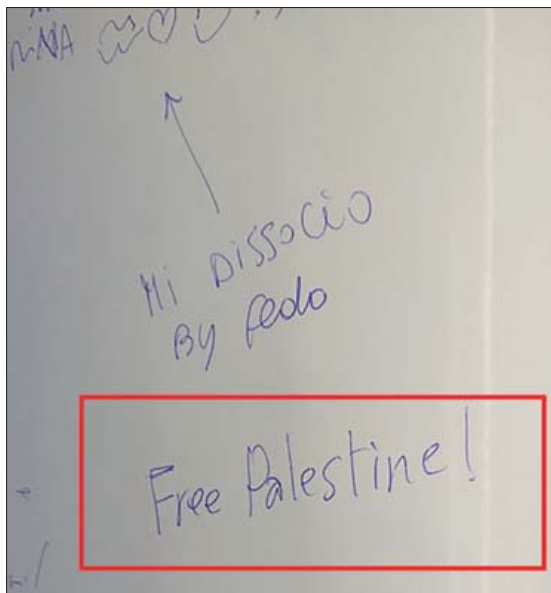

A significant rise in the number of manifestations of antisemitism in CR in 2022 also had an effect on the category of incidents documented in the public space. A total of 44 incidents were registered, the highest number until now – in 2021, they were 18. It is likely that the more than 100% increase of manifestations of antisemitism in this category, uncovered in 2022, is related to the release of extraordinary anti-epidemic measures.

March (Prague) – a sticker saying “Gas Juden” attached to an outdoor exhibition panel on Jiří z Poděbrad Square.

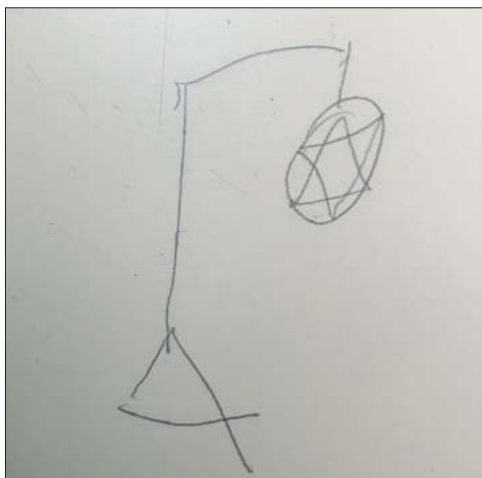

March – a record in the visitors' book in Maisel Synagogue:

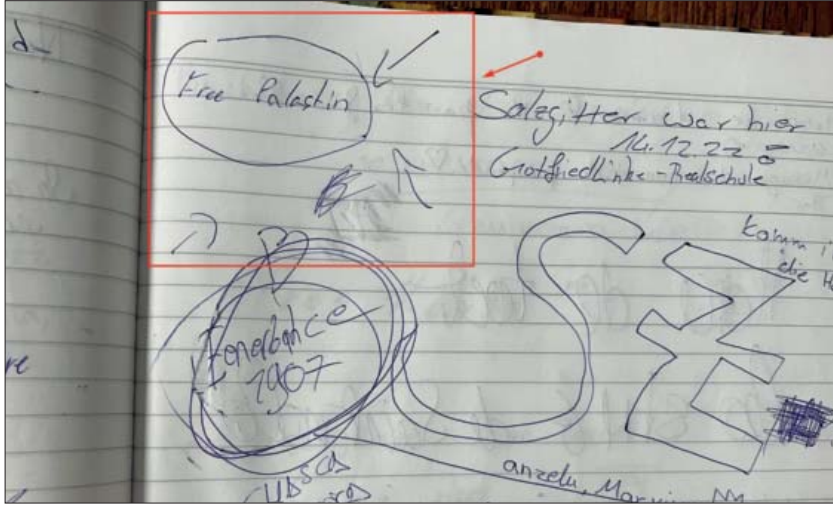

May (Prague) - Some statements demonizing Israel in leaflets entitled *"A petition against normalisation of Israeli occupation, colonisation and segregation"*, distributed in proximity to the venue of *Izrael na Vltavě* festival [Israel on Vltava River]. The printed material contained e.g. the following statement:

"We thus protest against any veneration of this undemocratic regime, which is attempting to present itself as the only democracy in the Middle-East. Mint-market's event in cooperation with Israeli Embassy in Prague presents an uncritical veneration not only of the expulsion of the original people of Palestine in 1948, but also the veneration of continuing NAKBA, i.e. its apartheid, which is attempting to make the lives of Palestinians unpleasant up to the point to make them leave the country. Under tempting programme with a cultural and gastronomic offer, the Izrael na Vltavě festival normalises the unacceptable reality of Israeli occupation, colonisation and segregation."

October – graffiti depicting a hung Star of David, documented inside a Rokycany – Plzeň train.

December – a record in one of the visitors' books in Terezín Memorial:

5.5.3 | LETTERS AND E-MAILS

Letters and e-mails with antisemitic content addressed to persons or institutions.

5.5.3.1 | Incidents in 2022

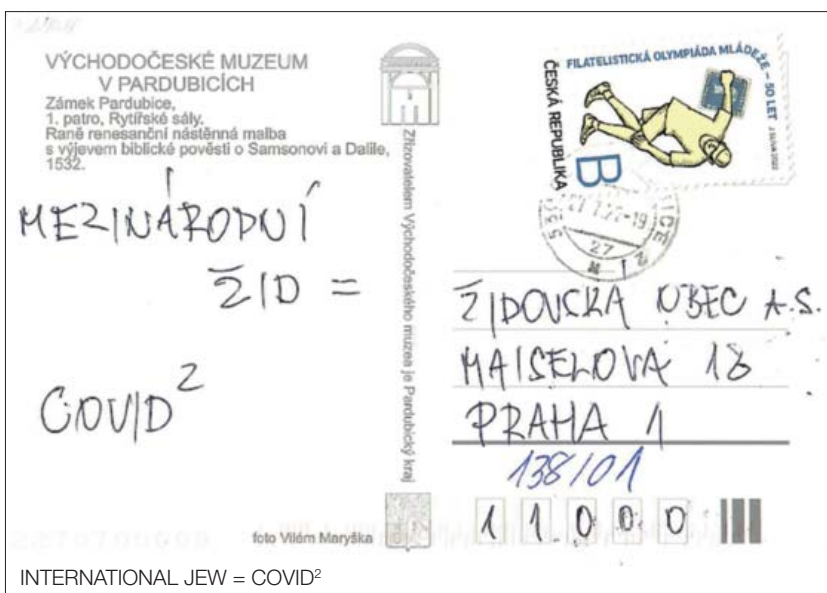

8 targeted e-mails and letters with antisemitic text were recorded in 2022. Although it was the highest recorded number since 2018, this category remains marginal among all antisemitic incidents, and, like in 2021, represents 0.4% of the total volume of registered data.

May – a series of harassing letters addressed to one of the Czech rabbis. One of the letters contained e.g. the statement (citation copies the original form incl. grammatical mistakes): *“Why Jews celebrating Simchat Torah dance with the Torah? Because they are proud of themselves that they suc-*

ceeded in cancelling the whole Torah. Because they are hypocrites as Jesus said, they dance with a rolled Torah, but they cancelled the content of Torah and this Jewish hypocrisy infected the whole planet.”

Another letter from the same series stated: *“The Jews have made Sodom and Gomorrah from Israel and the entire world with their indifference towards the God and Torah.”*

July – a postcard with a conspiracy message addressed to JCP:

August – an e-mail with strong antisemitic connotations and a long attachment, sent to one of the CR embassies abroad. One of the documents in attachment to the e-mail contained the following conspiracy statement:

“The monstrous and murderous regime of the Organized Crime Government (OCG) [Vláda Organizovaného Zločinu] is in today’s Bohemia formed in the vast majority by people of Jewish origin like in criminal regimes of the past. First, these people take up top positions in a country, then take on especially Jews as their subordinates and that’s how, step by step, they take over the entire country, its authorities, bodies and institutions.”

5.5.4 | PRINTED MEDIA

Antisemitic texts published in the press.

5.5.4.1 | Incidents in 2022

For the second time in a row, this category has seen a slight increase in lower units. In 2022, 7 articles in the press were recorded, which, just like in 2021, represent 0.3% of the total number of registered incidents.

February – an article entitled *“Confirmed. Israel commits crimes against humanity!”*, published in the printed issue of Haló noviny on 2 February 2022. It contains manifestations of new antisemitism, apparent especially in the following statements:

“ČTK says that Israel argues with security concerns when imposing travel restrictions on Palestinians, whose resurrection at the beginning of 21st century included suicidal bomb attacks in Israeli cities. But that it was Israel which caused this Palestinian despair by its brutal apartheid policy, again, due to its “modesty”, it will not add (...) Because Israel doesn’t want peace!”

March – an article headlined *“Ten lessons. Palestine and Ukraine”*, published in the print edition of Haló noviny on 15 March 2022 – manifestation of new antisemitism, containing also the following statement:

“Sports teams and famous sports personalities can express their solidarity and carry the Ukrainian flag (...) However, Palestine is an exception when it comes to sports personalities expressing any support to Palestinians living under a settler-colonial occupation structured with a built-in apartheid system of racial-religious segregation.”

December – an article headlined *“War in Ukraine: Wind blowing in from the Dead Sea”* published in the RADIX periodical No. 4, issued on 19 December 2022. It contains several conspiracy claims with antisemitic overtones, including the following:

“The Jewish lobby, of course, does not only dictate US foreign policy (...) The West is on the ropes after three-quarters of a century of rampant kosher capitalism. Its economy is in tatters (...) The parasite has sucked every last drop out of its Western host. It has already got everything it needed from it, and now it is concentrating on a fresh, long-prepared host in the East – facelifited by the controlled dismantling of “old” communism and technologically revitalised by half a century of sucking Western know-how with the spy vacuum cleaner of the Mossad and the KGB. (...) there is no corner of the globe where the wind is not blowing in directly from the Dead Sea. At least not when huge money or power is at stake.”

5.5.5 | INTERNET

Without any doubt, virtual platforms have played a key role in the spread of antisemitic manifestations for a long time and this trend is intensifying. As in previous periods, the vast majority of antisemitic incidents in the Czech Republic in 2022 took place in the online environment.

In 2022, 2,211 manifestations of antisemitism were registered in virtual environment, i.e. 97.1% of the total number of recorded incidents. Statistically, this trend can be described as stable, e.g. in 2021, less than 98% of the incidents came from the internet. However, the year-on-year increase in the total volume of data processed is worrying. Compared to 2021, which brought 1,099 recorded incidents, the number of incidents has doubled.

5.5.5.1 | ARTICLES

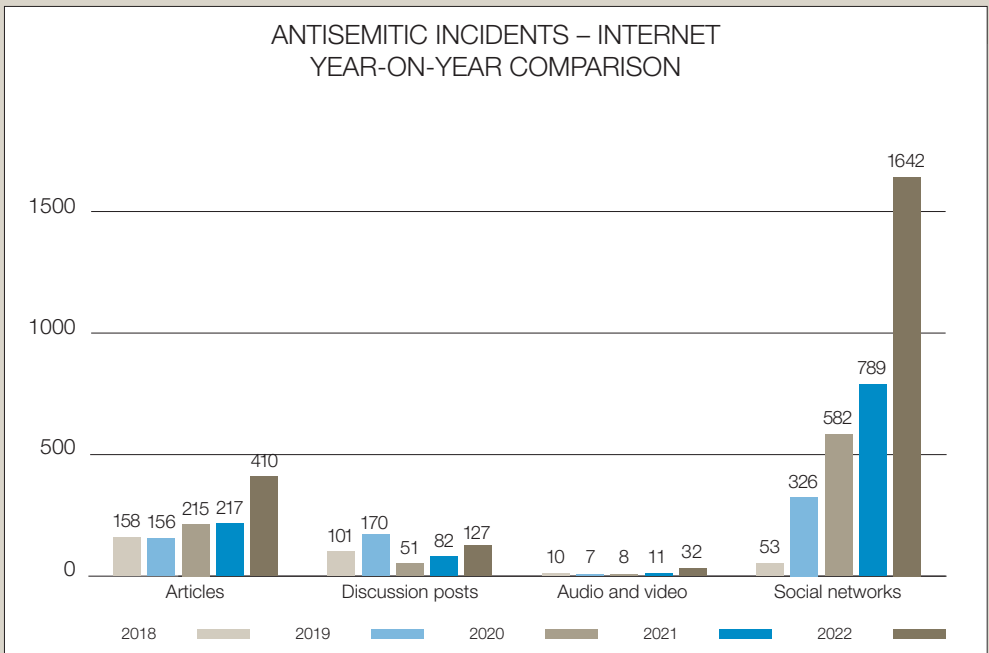

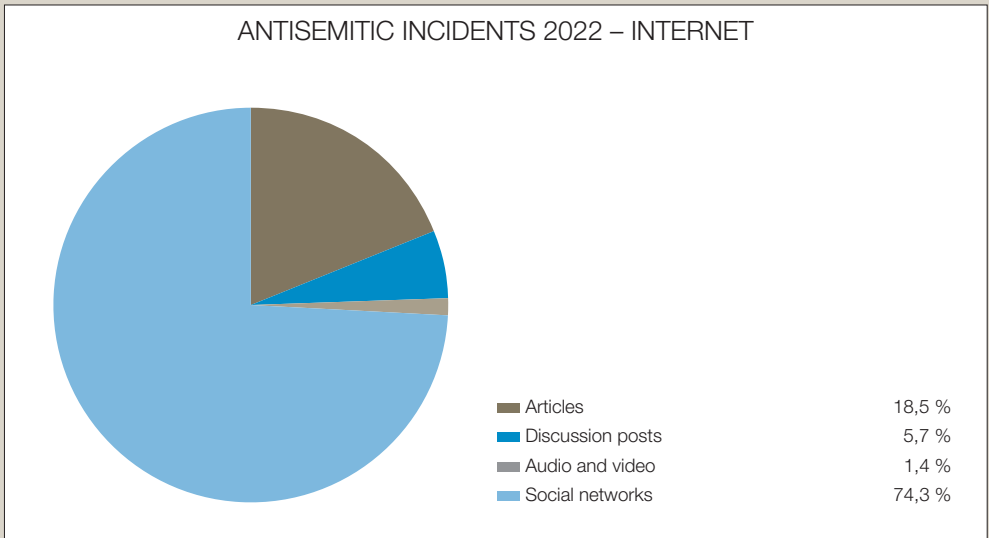

Antisemitic articles published on web sites of internet media and articles on web sites of individuals and also the monitored organisations.

5.5.5.1.1 | Incidents in 2022

The almost double year-by-year increase in the number of incidents showed e.g. in the category of internet articles with antisemitic overtones. In 2022, 410 such articles were recorded. In 2021 and 2020, they were 217, or 215. The reason behind this dramatic increase is undoubtedly to be sought in intense activity of disinformation platforms.

5.5.5.2 | DISCUSSION POSTS

Reactions and opinions of readers of internet articles, usually found in a separate discussion section. Antisemitic incidents belonging to this category are more often than not found also in articles which are not antisemitic in themselves, or don't even concern Jewish or Israeli topics. The

antisemitic posts recorded come from discussions on news servers, disinformation web sites and other monitored web sites.

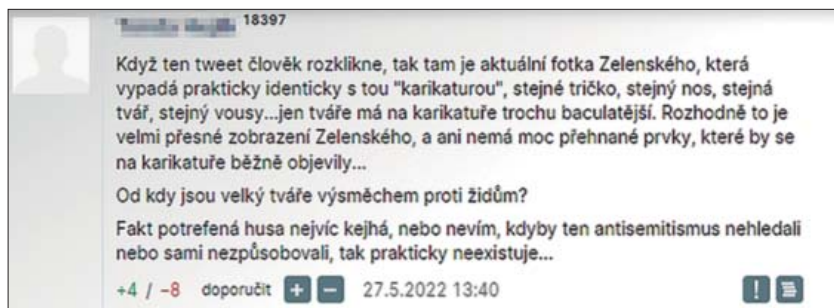

5.5.5.2.1 | Incidents in 2022

A relatively lowest increase in the number of incidents in internet environment was recorded in the area of discussion posts with antisemitic proclamations or invectives. In 2022, 127 such incidents were recorded. Nonetheless, in comparison with the last monitored period when 82 similar incidents were registered, it is a 50% increase.

Since when are large cheeks a way to mock the jews?

Really, a hit goose honks the most, or whatever, if they didn't seek this antisemitism or cause it themselves, it practically doesn't exist...

Petrovi sebral palušu Stalin nebo čeští kovaní soudruzi alá rodiče petra pavla????
A s tím,že „když si člověk němců nevšimal,oni si ho taky nevšimali“ bych si rovněž dovolil nesouhlasit,konkrétní příklad jsem měl ve svoji vzdálené větvi rodiny,což vím z vyprávění mojí tety,kdy jednoho z nich(vozil uhlí) falešně po árizaci majetku nařkl jeden židák,že ho okradl o peníze, které již v té době patřili třetímu reichu-okamžitě skončil na gestapu,kde byl asi týden a jediný jeho štěstí bylo,že onen izraelita údajně ukradené peníze doma později našel a přišel to nahlásit-po té týdenní rekreaci u hodných germánků byl z mého předka doživotní mrzák,ke své práci se už samozřejmě vrátit nemohl a té židovské svini nestál ani za to,aby se mu omluvil a než táhl do lágru,kde nejspíš proletěl kominem kolem mého předka chodil s rypákem nahoru a dělal že se nic nestalo-nemám nejmenší důvod svoji nebožce tetě nevěřit

Who stole the boozer from Petr – Stalin or Czech communists alias Petr Pavel's parents????
I also dare to disagree that “if you didn't provoke the Germans, they also let you be”, I know of a concrete example from among distant relatives, I know this from my aunt's stories, when after the aryanisation of property one of them (who transported coal) was accused by a kike that he stole money from him, which at that time belonged to the third reich-he immediately ended up at gestapo ,where they detained him and luckily this Israelite later found this money at home and came to the office to report it-after this one week's holiday with friendly germans my ancestor was a cripple for life, of course he could not return to his job and this jewish bastard didn't even come and apologise before he was dragged to the concentration camp, where he probably skyrocketed in a chimney next to my ancestor he was walking around with his snout up and pretended nothing happened-I don't have the slightest reason not to believe my deceased aunt

5.5.5.3 | AUDIO AND VIDEO

Manifestations of antisemitism on internet radios and videos with anti-semitic content published on the internet.

5.5.5.3.1 | Incidents in 2022

In 2022, 32 audio-visual posts with antisemitic content were registered on online platforms. Also in this area there is a marked rise, in 2021, 11 incidents were registered.

January – *National Resistance Council (NOR)* channel on Odysee platform – video with a conspiracy message and title “*What the Jews did to the Germans – it’s the same they will do to the Czechs – the same they do to each occupied nation*”, which contains e.g. the following statement: “*The first adulterous games were introduced in 1880 and 1890, i.e. one hundred years ago, by Jewish authors. It was adultery and sexual perversion of all kind (...) all so-called modern art was forced through by Jewish intellectuals, and this lead to great depression among German people (...) And the answer here in Germany was furious reactions. And that is the reason why Adolf Hitler took power.*”²³⁸

March – *MyspuleSvet* channel on Rumble platform – a videorecord in which resonates e.g. the following statement: “*...it is actually a plan on how to dominate and enslave us, the descendants of big white race members whom the people who enslave the world call goyim. So the question will also be how to enslave the goyim and how to lead them to eternal slavery of the new world order.*”²³⁹

May – *Tapin-radio* channel on Odysee platform – audio recording in which the chief editor of Aeronet disinformation web “*comments current news*” and e.g. says that “*If the processes don’t stop...they will do it, it’s totally real. I speak about the nuclear war now, they will really do it. The Russian Jewish congress cannot step back. It will not let the Zionists take them resources in Russia (...) because the Zionists are former Trockysts...*”²⁴⁰

September – *Dokumentaren* channel on Rumble platform – a video in English with Czech subtitles and description “*Jewish-Israeli Zionist occupation of Palestine*” containing multiple statements demonizing Israel. E.g. the following statement of Ilan Pappé: “*Whoever except Israel supports the solution of two states must be very careful. Because it means that 90% of historical Palestine will be Israel. The remaining 10% will be two huge prisoner camps, one in the Gaza Strip and the second on the West Bank.*”²⁴¹

5.5.5.4 | SOCIAL NETWORKS

Antisemitic posts on social networks, i.e. internet services which enable a registered user to create a profile, communicate with other users, share information, photographs, videos, etc. Problematic content is spread here by both individuals on their personal profiles and groups of people with similar mentality.

The issue of social networks and their role in the dissemination of manifestations of prejudicial hatred and ideological extremism has been given increased attention in the past few years, both from the part of laic and professional public, and from the part of investigative, prosecuting and adjudicating bodies. Despite this fact, more than 74% of antisemitic incidents in

²⁴⁰ <https://odysee.com/@radiosvstudiotapinradio:5/panvk-229:7>

²⁴¹ <https://rumble.com/v1jn1d6-idoizraelsk-sionistick-okupace-palestiny.html>

online environment came from the social networks. So the trend of the previously monitored periods continues because social networks still represent for their users a specific eco-system in which they can express their emotions, including manifestations of frustration and hatred, relatively anonymously.

From the point of view of content, the registered incidents cover a whole spectrum of manifestations of antisemitism. Besides isolated incidents, also long-term activity of specific groups and individuals where antisemitism forms a stable part of their virtual identity is represented. Czech users often share foreign-language posts, comments and antisemitic caricatures originally coming from foreign accounts (i.e. reposting).

From the character of data collected, it is clear that intense activity on social networks in the past year catalysed both the fading out covid-19 pandemic and the Russian–Ukrainian conflict, which drew the attention of the global population as early as beginning 2022. From the temporal point of view, the occurrence of antisemitic incidents in the course of the calendar year was relatively balanced, it was possible to record more considerable deviations in March in connection with the events in Ukraine and in May in connection with the death of Shireen Abu Akleh.²⁴²

5.5.5.4.1 | Incidents in 2022

In 2022, 1,642 antisemitic posts, reactions and comments were documented in the social network environment. In comparison with 2021, when 789 incidents came from the social networks, there was an apparent increase. More than half of the total number of manifestations of antisemitism was spread by users for whom anti-Jewish rhetoric is part of their image cultivated in the long term.

²⁴² See chapter 3.2.

Social networks continued to be dominated with mendacious, vulgar and stereotypical antisemitic claims and graphics. Conspiracy theories and manifestations of new antisemitism were also numerous.

Fakt se lidi vyserte na prohané keci Q-anon. Na obrázku je mince Abrahamovi dohody. Přečtete si Toru pokud chcete vědět s kým a jakou dohodu to vlastně má. Madonna nám to říká https://youtu.be/VG3WkiL0d_U (na konci klipu všichni naskáčou do propasti kromě 2. co mají na zádech Izraelskou a Palestinskou vlajku) Zbude na světě jen Abrahamovo sémě. Neexistují dobří a špatní Židé si myslím. Jsou jedni co pošlou gojímí udělat nějakou sviňárnu a druzí co pošlou druhé gojímí tu sviňárnu řešit. Výsledek je požadovaný úbytek gojímů co mají v hlavě tak nasráno, že je poslouchají.

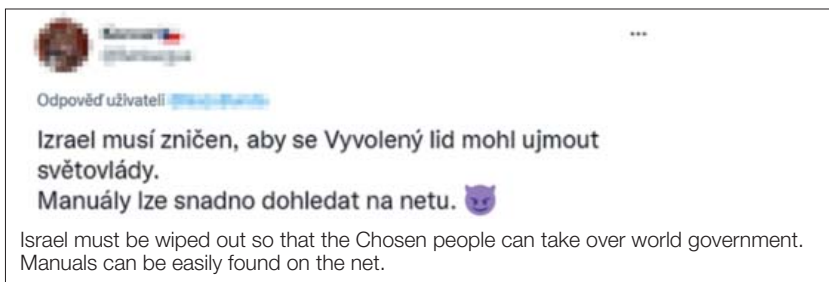

Guys, don't give a shit about the lies of Q-anon. The picture shows Abraham Accords' coin. Read the Torah if you want to know what the agreement actually is and with whom. Madonna tells us so https://youtu.be/VG3WkiL0d_U (at the end of the clip, everyone jumps into the chasm except for 2 who carry the Israeli and the Palestinian flag on their backs) Only Abraham's semen will be left in the world. There is nothing like good or bad Jews I think. One group sends goyim do some dirty trick and the second one sends the goyim solve the dirt. The result is the required drop in goyim numbers, who are so full of shit that they listen to them.

6 | JEW-FLU PANDEMIC - CASE STUDY ON MANIFESTATIONS OF ANTISEMITISM DURING THE COVID-19 EPIDEMIC IN THE CZECH REPUBLIC

April 2020, British organisation Community Security Trust:²⁴³

“Antisemitism has often been compared to a virus, but really it acts like a parasite: because whenever there is a major crisis in the world, antisemites use it to spread their hatred for Jews. No matter how much genuine suffering there is, antisemites will always react to it by blaming Jews, and then find a way to spread their particular venom to others. The COVID-19 pandemic that is currently gripping the entire world is no exception. One example (...) is the explosion of antisemitic conspiracy theories that began to populate social media as soon as news emerged of a dangerous new virus spreading across the world”²⁴⁴

November 2020, World Jewish Congress:²⁴⁵

“Antisemitic conspiracy myths are not a new phenomenon; they have existed for centuries. In times of uncertainty and economic hardship, such myths flourish and gain increased popularity and support. In the past, violence resulting from conspiratorial beliefs has resulted in pogroms, death, and destruction. However, one does not need to look far into the past, as several

recent terror attacks were influenced, in part, by such conspiratorial beliefs. During the current global coronavirus pandemic, conspiracy myths in general, and those related to antisemitism in particular, are becoming increasingly widespread”²⁴⁶

October 2021, Amadeu Antonio Stiftung foundation²⁴⁷ (Germany), Hope not Hate²⁴⁸ (United Kingdom) and Expo Foundation²⁴⁹ (Sweden):

“The last two years has seen the world gripped by the tragic spread of COVID-19. In the face of such widespread devastation there have been remarkable moments of collaboration and hope but also fear, confusion and of course, death. One side effect of the pandemic is that it has enabled a sprawling, multi-faceted web of conspiracy ideologies to grow exponentially around the globe, opening new pathways towards antisemitism and Holocaust denial.”²⁵⁰

October 2021, European Commission:²⁵¹

“(…) the COVID-19 pandemic has shown how old antisemitic prejudices can resurge and fuel new conspiracy myths and hatred online and offline. Jewish people have been one of the most attacked communities during the pandemic; they have been unjustifiably blamed for creating the virus and for developing vaccines to make a profit. This is compounded by comparisons of pandemic measures with policies that led to the genocide of the Jewish people that minimise and trivialise the experiences of Holocaust victims and survivors.”²⁵²

The quotations above were selected relatively at random from dozens of similarly formulated statements and all of them come from various institutions and from various phases of the covid-19 pandemic, but in fact, using similar words, they describe the same phenomenon. With a little exaggeration, we can say that the virus spreaded as fast, globally, dangerously and infectiously as the dissemination of antisemitic prejudicial hatred. An ambition of this case study is to summarise representative examples and trends in the manifestations of antisemitism in connection with the covid-19 disease epidemic in the Czech Republic.

GLOBAL COVID-19 PANDEMIC

The highly infectious covid-19 disease is caused by severe acute respiratory syndrome of coronavirus SARS-CoV-2.²⁵³ The virus was first identified in December 2019 in Wuhan, the capital of Hubei Province in Central China.²⁵⁴ The spread of the infection escalated rapidly, and by mid-January 2020, the first cases of infected people outside mainland China were recorded. On 30 January 2020, 7,711 cases were confirmed in 18 countries, and the World Health Organization (WHO), a specialized agency of the United Nations, first declared the epidemic a *“Public Health Emergency of International Concern”*²⁵⁵ and on 11 March 2020 a pandemic, i.e. an epidemic with worldwide spread. Two days later, on 13 March 2020, T. A. Ghebreyesus, Director-General of the WHO, identified the European continent as the main epicentre of the infection.²⁵⁶ Almost all the countries of the world

²⁵³ If not otherwise stipulated, all data on the origin and spreading of the covid-19 disease are taken from the official output of the World Health Organization (WHO): <https://www.who.int/emergencies/diseases/novel-coronavirus-2019>

have begun to implement, to varying degrees, anti-epidemic measures in response to WHO recommendations:

- Border closures and restrictions or bans on travel abroad and to risk areas within countries.
- Lockdown and “social distancing”,²⁵⁷ i.e. restrictions or bans on the free movement of people, assembly, isolation, quarantine, closure of schools, workplaces, sports facilities, cultural facilities or shops.
- Respiratory hygiene, i.e. the use of protective facial equipment such as face masks, respirators and masks.
- Infection testing and tracing.
- Vaccination to achieve collective immunity. Active substances began to be developed and tested by pharmacological concerns in a number of countries soon after the outbreak of the pandemic. In August 2020, the world’s first ever covid-19 vaccine, Sputnik V, was approved in Russia. However, Russian, as well as Chinese vaccines, have been used only locally and marginally in the global context, as they have not been approved by either the European Medicines Agency²⁵⁸ or the US Food and Drug Administration.²⁵⁹ Therefore, vaccines from Pfizer-BioNTech, Moderna, AstraZeneca and Johnson & Johnson have been predominantly used in the Euro–American area.

Covid-19 disease has spread in several waves over the past three years, defined mainly by the current mutation or variant of the virus. On 30 January 2023, the World Health Organization announced that the pandemic is still considered Public Health Emergency of International Concern,²⁶⁰ but most

countries around the world (including the Czech Republic) already lifted all widespread anti-epidemic measures in the first months of 2022 due to the rapidly declining number of infected people and the endemicity of the disease. According to the World Health Organization, as of 7 March 2023, there were 759,408,703 confirmed cases of infection, 6,866,434 deaths due to covid-19 and 13,229,471,213 vaccine doses administered.²⁶¹

COVID-19 EPIDEMIC IN THE CZECH REPUBLIC

The first cases of covid-19 in the Czech Republic²⁶² were confirmed on 1 March 2020 in three people who contracted the disease in northern Italy.²⁶³ On 22 March of that year, authorities announced the first death of a patient infected with coronavirus in the Czech Republic,²⁶⁴ with a total of 3,314 confirmed cases of infection at the end of the month. The rapid onset of the epidemic was accompanied by a critical shortage of protective equipment and medical supplies. On 11 March 2020, all schools were closed, a state of emergency was declared a day later and lasted until 17 May, restaurants and most other establishments were closed two days later, the state border was closed on the night of 15–16 March, a curfew without face protection was declared on 19 March and a ban on being in public with more than one more person was imposed on 24 March. The reality of 2020–2021 was marked by further waves of disease and chaotic crisis management: the government adopted a large number of emergency anti-epidemic measures,²⁶⁵ the wording of which often changed within hours, and some of

which were overturned by the Municipal Court in Prague. From the beginning of 2020 until 17 December 2021, the CR had four ministers of health²⁶⁶ within one government and there was an ambitious and unsuccessful project to develop a Czech vaccine against covid-19.²⁶⁷ “PES”,²⁶⁸ a binding anti-epidemic emergency system, was put in place and never observed. The prolongation and abolition of the state of emergency was difficult to predict and made the everyday life complicated. The media space was being filled with information on a confusing strategy for the vaccination campaign and the supply and distribution of vaccines, on the collapse of the contact-tracing system and the failure of the eRouška²⁶⁹ application, on the deteriorating economic situation of the Czech Republic.²⁷⁰ The government that emerged from the parliamentary elections in October 2021 began to lift up anti-epidemic measures relatively quickly at the beginning of 2022 in the context of a significant decline in the number of infections.²⁷¹ From the beginning of the epidemic, 4,620,287 cases of infection (including reinfection), 42,504 deaths with covid-19 were recorded and 18,619,422 vaccination doses applied until 11 March 2023, as the statistics of the Czech Ministry of Health say.²⁷²

CORONAVIRUS, DISINFORMATION AND CONSPIRACIES

The pandemic was a protracted global health crisis with many negative, often tragic, impacts that affected almost all areas and spheres of individual and societal life. Secondary crises were manifested in economy, politics, international relations, education and culture, social cohesion, in the quality of the environment, etc. The coronavirus has become an unwitting hegemon of the private, the public and the virtual space. Life moved from the real world to the online environment, which was soon saturated with opaque, confusing and contradictory information. The world public polarised more and more. As a result of uncertainty, instability, frustration, fear and the unpredictability of future developments, various lies, manipulations and hoaxes about the nature of the ongoing pandemic and the preventive measures to stop it were massively disseminated in the global information space: from the belief that in reality there is no pandemic,²⁷³ to the promotion of, for example, hot water,²⁷⁴ colloidal silver²⁷⁵ or the anti-parasitic Ivermectin²⁷⁶ as effective drugs, to absurd fabrications linking the spread of the disease to the operation of 5G networks²⁷⁷ or the claim that the pandemic was predicted in an episode of the popular TV series *The Simpsons* back in 1993.²⁷⁸ The common denominator of all disinformation was the implicit assumption that the mainstream media, politicians, the professional community or regional and global institutions were for some

reason misleading the public and concealing or falsifying the true nature of the covid-19 disease. The more or less overt and admitted conspiratorial nature was therefore a distinguishing characteristic of all pandemic disinformation.

On 4 May 2020, a conspiracy video entitled *Plandemic: The Hidden Agenda Behind Covid-19*²⁷⁹ was posted on the internet. The twenty-six-minute interview with controversial American virologist Judy Mikovits soon went viral and reached tens of millions of views within days.²⁸⁰ Although YouTube and Facebook social networks promptly blocked the video, it was still available on other platforms, and three months later a second episode,²⁸¹ entitled *Plandemic: Indoctrination*, followed. The video with J. Mikovits codified the term “*plandemic*”, which is used in the public space and which the study borrowed for its title. The same borrowing was done by the American naturopath Bruce Fife,²⁸² who published the conspiracy publication *Plandemic: Exposing the Greed, Corruption, and Fraud Behind the COVID-19 Pandemic* in August 2020. In the very opening chapter, the author manages to capture the quintessence of conspiracy thinking in crystal-clear form: “*The purpose of this book is to expose the truth behind the COVID-19 plandemic so that you will be aware of the facts and not have your freedom blindly taken from you (...) Contrary to the narrative projected by the mainstream media and public health officials, the COVID-19 pandemic did not start in Wuhan, China in December 2019, but began years earlier in boardrooms across the globe among some of the world’s richest businessmen*

Every step of the pandemic was carefully thought-out and planned to the tiniest detail, from the selection of the infectious agent (SARS-Cov-2) to its method of release, and how it would be publicly promoted to generate the greatest amount of fear and panic. The exact steps taken to manage the pandemic were designed to maximize the world's fear and make us more vulnerable (...).*²⁸³

In March 2020, following WHO recommendations, national governments began to implement intensive and historically unprecedented anti-epidemic measures based mainly on the principle of social distancing. In April 2020, lockdown was implemented in more than 90 countries in varying degrees and intensities,²⁸⁴ affecting more than 3.9 billion people, i.e. half of the world's population.²⁸⁵ The disinformation that spread in the global information space, especially on social networks, directly threatened public health and the success of the fight against the pandemic. The destructive potential of disinformation began to be pointed out by many institutions,²⁸⁶

COVID-19 ANTISEMITISM AROUND THE WORLD

The authors of disinformation content have attributed responsibility for the pandemic to several entities and individuals over time. The list of alleged culprits who sought to take over the world through a fictional or deliberate pandemic includes, among others, the United States, China, the European Union, Anthony Fauci,²⁸⁸ Bill Gates, and vaguely defined “global elites” who were often given inherent stereotypical anti-Jewish characteristics. In hindsight, it is clear that the alleged conspirators are statistically dominated by Jews, who covertly control world powers, the UN, the WHO, pharmaceutical corporations, the media, Bill Gates, Donald Trump, and pop culture celebrities. The conspirators either explicitly named famous Jewish figures such as George Soros or the Rothschild family, or blamed Jews in general or the State of Israel, which, in the context of the new antisemitism, symbolises a kind of a collective Jew. In the Czech environment, almost all politicians of the time who were in charge of fighting the epidemic were

²⁸⁷ A strategy of intervention called “debunking”, i.e. subsequent disproval of disinformation, was complemented by “prebunking” or “inoculation”, i.e. predictive warning against potential disinformation even before it appears. labelled as Jews or as treasonous and corrupt puppets controlled by the Jewish mafia. The linguistic means used varied from direct denotation to well-known verbal codes, for which the term “dog whistle” is used in the English language environment. The word “Jews” was replaced by phrases such as “banker Kikes”, “Zionist agenda”, “ZioNazi”, “financial elites”, “Hollywood elites”, “globalists”, and in Czech, “House of Zion” [“Dům Sion”], “globalists”, “House of the Tetragram” [“Dům JHVH”], “Hasidim” [“chasidé”], “Judeo-Masons” [“Židozednáři”], “crooked noses” [“křivonosové”], “Khazars” [“Chazaři”], “Khazarian Mafia” (also as “KhM”) [“chazarská mafie”, “ChM”], “Zionist conspiracy” [“sionistické spiknutí”] or “Zionist Mafia” [“sionistická mafie”], “Kabbalah”, “Satan’s Synagogue” [“Synagoga Satanova”], etc.

The British organisation CST was the first to draw attention to the later widely cited historical parallel between the covid-19 pandemic and the plague epidemic that struck Western Europe between 1348 and 1350: *“This association of Jews with disease and infection is not original and draws on a long history and deep-rooted antisemitic tropes. The best known, and most dramatic, example of this came in the late 1340s, when bubonic plague – the Black Death – swept through Europe, killing around 20 million people. This staggering death toll amounted to a third of the entire population of Western Europe. In many places, Jews were blamed for causing the plague by allegedly poisoning wells, and they were tortured, put on trial, executed and expelled. Thousands of Jews were murdered for this non-existent crime and hundreds of Jewish communities were destroyed.”*²⁸⁹ At the heart of the medieval myth about poisoning water in wells and springs was the belief that Jews wanted to exterminate Christians. Similarly, covid-19 conspirators accused Jews of deliberately spreading the disease to wipe out the “white” population. In

²⁸⁹ <https://cst.org.uk/data/file/d/9/Coronavirus%20and%20the%20plague%20of%20antisemitism.1615560607.pdf>, p. 3.

the context of the pandemic, current conspiracy myths took on new meanings as they gradually permeated the mainstream narrative from marginal extremist ideologies as a result of their massive dissemination. For example, the original far right myth of *"The Great Replacement"* draws on the conspiracy premise of the controlled replacement of the "white" population by waves of immigration from non-European countries in order to create a racially homogeneous and easily controllable society. The hidden entity that implements the population replacement is, of course, the Jews, who used to take advantage of or cause geopolitical and war crises to achieve their goal, but now covid-19 serves the same purpose. In a similar vein, the conspiracy theory of the *New World Order* (NWO) has metamorphosed, which is based on the assumption that a small group of *international elites* rule the entire world by controlling industry, media, public opinion and politics through a system of central banking. In this context, the covid-19 pandemic has become either another way of controlling the world population, a tool to reduce the world population, or a new source of financial income, mainly from vaccination. The alleged secret community behind the New World Order and the implementation of its global agenda is strongly identified with Jewish world government. A new motive has also emerged in the originally American conspiracy myth *QAnon*, which refers to a set of loosely interrelated far right theories based on the premise of a global secret organisation covertly controlling the world. The conspirators are sometimes referred to as the *"Deep State"*, the Illuminati or Satanic paedophiles, whose black masses involve mostly child ritual sacrifices. From the bodies of the murdered, the psychoactive substance Adrenochrome is extracted, which induces a state of euphoria and prolongs life. As the number of cult members and thus also the number of drug users is supposedly increasing, more and more ritual sacrifices are necessary. All wars, riots, violence, Islamist terrorism and, more recently, the covid-19 pandemic are perceived merely as a cover for

obtaining the sufficient number of bodies. QAnon supporters believe that the worldwide conspiracy is directed and financed by George Soros, the Rothschild family or Jews in general. In fact, the concept of ritual murder refers directly to the original medieval antisemitic superstition about the need for Christian blood.²⁹⁰

However, the web of historical parallels and allusions is much more intricate and complex. The obsessive conspiracy myth of Jews as the originators of the pandemic is but a modern reiteration of the theory of a supposed coordinated worldwide Jewish conspiracy of the second half of the 19th and early 20th centuries. From the Dreyfus Affair and the pamphlet *The Protocols of the Elders of Zion*, a proven forgery by the Russian czarist police, there is a direct line to the racist ideology of National Socialism and the Holocaust. At the same time, manifestations of antisemitism associated with the covid-19 pandemic accused the Jews of being the main carriers of the virus, or even identified them with the virus. *Animalization*, i.e. the dehumanizing comparison of Jews to insects and animals that are perceived as dirty, repulsive, insidious or parasitic, appeared as early as the 4th century in the works of the Church Fathers of Christian antiquity, and it has

²⁹⁰ A great number of studies and publications on antisemitic conspiracy theories related to the covid-19 disease is available e.g.: <https://cst.org.uk/data/file/d/9/Coronavirus%20and%20the%20plague%20of%20antisemitism.1615560607.pdf>; <https://cst.org.uk/data/file/7/e/Antisemitism%20in%20the%20Covid%20Conspiracy%20Movement.1659522389.pdf>; <https://www.amadeu-antonio-stiftung.de/wp-content/uploads/2021/10/antisemitism-in-the-digital-age.pdf>; <https://wjc-org-website.s3.amazonaws.com/horizon/assets/3yqx8bza/myths-r6-final.pdf>; <https://wjc-org-website.s3.amazonaws.com/horizon/assets/ZlVbha1v/quanon-r4-final.pdf>; https://www.iffse.eu/wp-content/uploads/2021/10/IFFSE-report-Entwurf-Doppelseiten-12_13-10-21.pdf; https://www.govil/BlobFolder/news/wzo24012022/en/file_2021%20report-final.pdf; https://en-humanities.tau.ac.il/sites/humanities_en.tau.ac.il/files/media_server/Extract%20of%20the%20Annual%20Worldwide%20Report%20for%202020.pdf; [https://www.govil/BlobFolder/generalpage/report_anti240121/en/anti-semitism_2020%20YEARLY%20REPORT%20-%20FINAL%20\(EN\)_v7.pdf](https://www.govil/BlobFolder/generalpage/report_anti240121/en/anti-semitism_2020%20YEARLY%20REPORT%20-%20FINAL%20(EN)_v7.pdf); European Commission, Directorate-General for Justice and Consumers, Comerford, M., Gerster, L., The rise of antisemitism online during the pandemic : a study of French and German content, Publications Office of the European Union, 2021, <https://data.europa.eu/doi/10.2838/671381>.

passed through history until present day. The phrase *"Jew-flu"*, which has become a universally understandable synonym for covid-19, thus carries two meanings: first, it denotes Jews as a harmful virus threatening non-Jewish population, and second, it holds Jews responsible for spreading the contagion as a tool for world domination.

In addition to stereotypical anti-Jewish claims and conspiracy myths, manifestations of antisemitism which fall into the category of minimising or trivialising the Holocaust were significantly represented during the pandemic. Covid-19 deniers compared the restrictions resulting from the anti-epidemic measures to the discriminatory status of Jews during World War II. One of the symbols of this completely ahistorical and absurd premise, which had no realistic or rational basis, was the misuse of the yellow six-pointed star, in which the word *"Jude"* was replaced by the word *"Unvaccinated"*. The same premise was the basis for the graphic modifications of the phrase *"Arbeit macht frei"*, which is familiar from the gates of many Nazi concentration camps, into *"Impfen macht frei"* or *"Vaccine macht frei"*. While the conspirators denied the existence or seriousness of the covid-19 disease, for which the dominant narrative held Jews responsible, they identified themselves as Jewish victims of national-socialist racial persecution. This apparent logical contradiction can be explained by a conspiratorial worldview in which the proponents of the conspiracy myths see themselves as both persecuted victims and courageous fighters against an insidious conspiracy.²⁹¹

Internal incoherence is an immanent feature of conspiracy thinking, and its proponents may believe in ideological constructs that contradict each

²⁹¹ See e.g.: <https://www.climatechangecommunication.org/wp-content/uploads/2020/03/ConspiracyTheoryHandbook.pdf>

other: The virus simultaneously exists and does not, and Jews have a power or financial interest in the global spread of the virus as well as in the lie of a non-existent virus. Vaccination simultaneously works and it does not, and Jews have a power or financial interest in the development and production of vaccines because they control the global pharmacological industry.²⁹²

COVID-19 ANTISEMITISM IN THE CZECH REPUBLIC

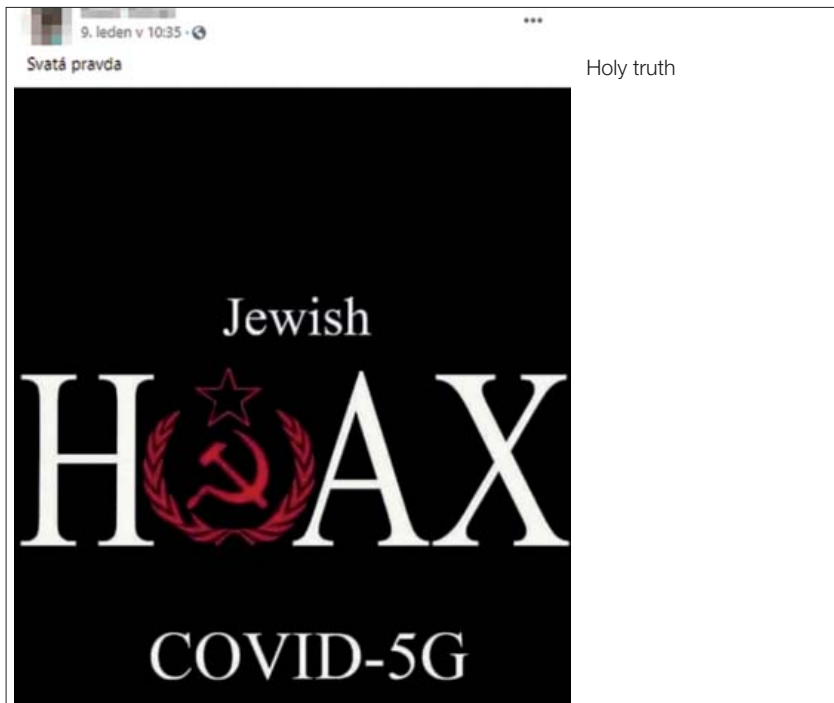

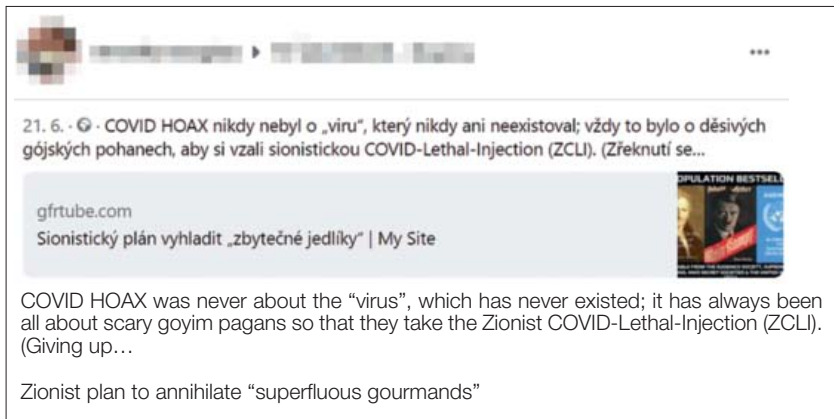

Manifestations of antisemitism in the Czech Republic associated with covid-19 largely followed global trends.²⁹³ Anti-Jewish texts and graphics were massively disseminated mainly in the online environment, with social networks being the dominant platform for sharing them. Czech authors and disseminators mostly adopted foreign content with their own addenda or comments (“reposting”). The entire disinformation eco-system (i.e. web sites, chain e-mails and social networks) was involved in the dissemination of conspiracy theories, absorbing both far right and far left manifestations of anti-Jewish prejudicial hatred,²⁹⁴ and its share in the overall increase in the number of antisemitic incidents increased steadily between 2020 and 2022. The following examples of manifestations of covid-19 antisemitism do not claim to be complete in any respect and constitute only a representative summary:

²⁹² In English-speaking environment, the alleged conspiracy of pharmaceutical corporations is designated as “Big Pharma”.

²⁹³ The only exception is „*zoombombing*“, i.e. attacks against events happening at the Zoom platform or via other services designed to organise videoconferences. Uninvited guests with extremist motivation would infiltrate the event organised, harass the attendees and often present insulting content, e.g. antisemitic graphics or pornography. Only one case of zoombombing was recorded in Czech environment in November 2020: a cyber attack was targeted at a public online lecture of the Centre for Jewish Studies, Faculty of Arts, Palacký University Olomouc. See 2020 AR, p. 32: <https://www.fzo.cz/wp-content/uploads/FZO-VZ20-F4-email.pdf>

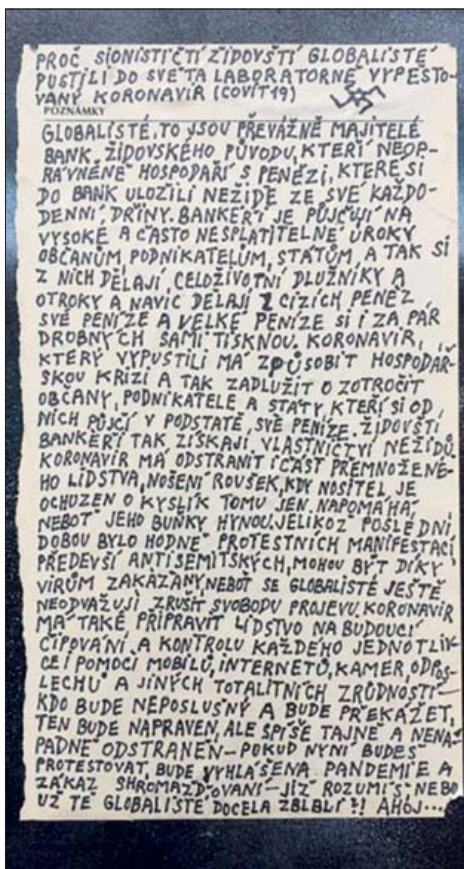

²⁹⁴ In this context we can consider symptomatic that the above-quoted conspiracy publication *Plandemic: Exposing the Greed, Corruption, and Fraud behind the COVID-19 Pandemic* was issued in 2021 by Bodyart Press, which is known for publishing far right literature.

1. Premise: The virus does not exist, it is a global lie made up by the Jews to govern, enslave or economically destroy the world.

I would not compare unvaccinated people to the Jews, because it was the Jews who made up and spread vaccination and the epidemic.

WHY DID THE ZIONIST JEWISH GLOBALISTS RELEASE INTO THE WORLD A CORONAVIRUS CULTIVATED IN THE LABORATORY (COVID 19)

THE GLOBALISTS ARE ESPECIALLY BANK-OWNERS OF JEWISH ORIGIN, WHO, WITHOUT AUTHORISATION, MANAGE THE MONEY WHICH NON-JEWS HAVE PUT IN THE BANKS AFTER WORKING LIKE DOGS. BANKERS LEND IT WITH HIGH AND OFTEN UNPAYABLE INTEREST RATES TO CITIZENS, ENTREPRENEURS, STATES, AND THAT IS HOW THEY INDEBT THEM AND ENSLAVE THEM FOR LIFE, AND WHAT'S MORE THEY PRETEND THAT SOMEONE ELSE'S MONEY IS THEIR MONEY AND THEY PRINT BIG MONEY FOR SMALL CHANGE. THE CORONAVIRUS THAT THEY HAD LET OUT INTO THE WORLD IS SUPPOSED TO CAUSE AN ECONOMIC CRISIS AND INDEBT AND ENSLAVE THE CITIZENS, ENTREPRENEURS AND STATES, WHICH, IN ESSENCE, BORROW THEIR OWN MONEY FROM THEM. JEWISH BANKERS THEN ACQUIRE THE PROPERTY OF NON-JEWS. THE CORONAVIRUS IS ALSO SUPPOSED TO LIQUIDATE ONE PART OF THE OVERPOPULATED SOCIETY, WEARING FACE MASKS WHEN THE PERSON WEARING IT IS DEPRIVED OF OXYGEN ONLY CONTRIBUTES TO IT BECAUSE HIS CELLS ARE DYING. AS RECENTLY THERE HAVE BEEN MANY PROTEST MANIFESTATIONS, ESPECIALLY ANTISEMITIC, THEY CAN BE FORBIDDEN THANKS TO THE VIRUSES SINCE THE GLOBALISTS HAVE NOT DARED TO ABOLISH THE FREEDOM OF SPEECH YET. THE CORONAVIRUS IS ALSO SUPPOSED TO PREPARE THE HUMANITY FOR FUTURE CHIPPING AND CONTROL OF EVERY INDIVIDUAL WITH THE HELP OF MOBILE PHONES, THE INTERNET, CAMERAS, WIRETAPPING AND OTHER TOTALITARIAN ATROCITIES – THE ONE WHO DISOBEYS AND WILL STAND IN THE WAY, WILL BE CORRECTED, BUT MORE LIKELY SECRETLY AND DISCREETLY LIQUIDATED – IF YOU PROTEST NOW, A PANDEMIC AND PROHIBITION OF ASSEMBLY WILL BE ANNOUNCED – YOU UNDERSTAND, OR HAVE THE GLOBALISTS TOTALLY BRAINWASHED YOU?! CIAO...

2. Premise: The virus does exist, it is carried and spread by the Jews who are compared to parasites, insect or animals with negative connotations.

3. Premise: The virus does exist, this unplanned pandemic was misused by the Jews to govern, enslave or economically destroy the world.

It can be. I also tend to think that it's all bullshit.
I personally know just one person who has it. He was at home for 14 days and he is back to work now

Agree! The virus does exist, I don't deny it, but I hate to watch the fuss around it and I feel it smells of little "j" (Zionists). All this has a much higher aim.
The darkness is coming.

Celá pandemie nese znaky uměle vyvolané paniky, která má zdecimovat ekonomiku a vzdělávací systém bílých zemí a bílého obyvatelstva. Strachem vyděšený gojim sedí zavřený doma u televize a zatím mu globální elity a jejich místní pátá kolona likviduje ekonomicky zemi a vozí do země nové obyvatelstvo z Afriky a Asie.

Jakýkoliv nezávislý názor na koronavirus je okamžitě označen za „konspirační teorii“

The whole pandemic has traces of artificially triggered panic, which is supposed to devastate the economy and educational system of white countries and the white population. The goyim scared to death is sitting at home locked up watching TV while the global elites and their local fifth column are economically devastating his country and bringing new inhabitants from Africa and Asia into the country.

According to my calculation, we are boiling-I can't feel anything-Conspiracy

Any independent opinion on covid-19 is immediately labelled as a “conspiracy theory”

Česká cesta vedla k úmrtím navíc a dlouhým lockdownům, říká vědec z Oxfordu vše je pravda, ale to nesmí být ve vládě židě jako hamáček a prý ministr blatný. tyto dvě kurvy plní zadání židu ovládající svět. pokud bude žit jen jeden žid, nebude ve světě klid

...

The Czech path led to extra deaths and long lockdowns, a scientist from Oxford says everything is true but as long as the government includes Jews such as hamáček and so they say minister blatný. these two bitches follow instructions of Jews governing the world. as long as one single Jew is alive, there shall be no peace in the world

Vojín Sálus věřil, že za každým svinstvem na světě stojí v pozadí žid a tahá za provázky. Tento „covid“ je vymyšlen a tvrdě propagován židovskou verbezi, která tisíce let usiluje o světovladu, protože jedině židáci jsou „vyvolení“ národ. At se dnes podíváme kamkoli, židy se to jenom hemží. Stejně zuřivě a nenávislně postupují proti každému, kdo tvrdí, že tzv. holocaust je židovský výmysl, aby mohli fnukat a hrát si na ublížené. Jak je to dlouho, co řval „Světový židovský kongres“ (mmchm, který národ má světový kongres?!?) proti tomu anglickému vědci, který na základě zkoumání prohlásil, že Němci prostě za těch pár let nemohli smaznout šest milionů židaku, protože to bylo prostě nemožné, nehledě k tomu, že v KT byly stovky jiných národností; o nich se ovšem mlčí, jediní chudačci jsou propagováni židi.

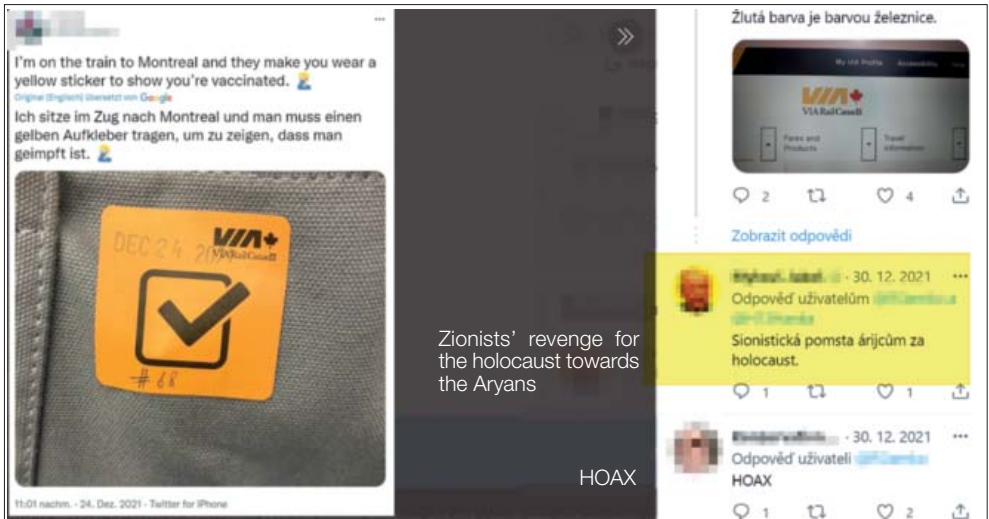

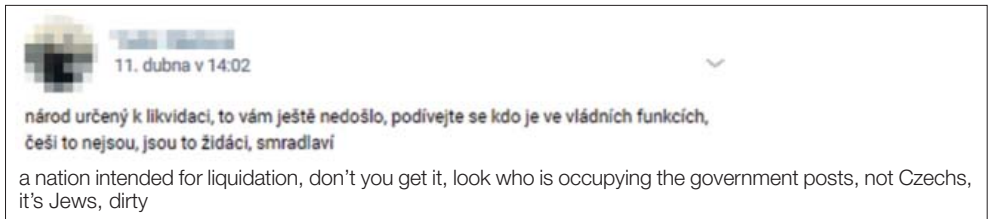

Private Sálus believed that behind every shit happening around the world there is a Jew in backstage pulling strings. This “covid” has been made up and is harshly propagated by Jewish scum, which has been striving for world government for thousands of years because just Jews are the “chosen” people. Wherever you look today, it’s just Jews around. They proceed as furiously and with hatred against everyone saying that “holocaust” is what Jews have made up, so that they can whine about their fate and pretend that the others are mean to them. How long ago is it that the “World Jewish Congress” (btw, which nation has a world congress?!?) was yelling at the English scientist, who announced, based on research, that the Germans could not have erased six million kikes in such a short time because it was simply not possible, plus there were hundreds of other nationalities in the concentration camps; but no one talks about them, the only ones promoted are poor Jews.

Vakcína je pouze záminka pro zavedení covidových pasů a systémů sledování a rozlišování mezi očkovánými a neočkovanými. Vakcína není cíl pro vaše dobro a zdraví, vakcína je prostředek pro mediální a politické zdůvodnění potřeby následného sledování, identifikování a rozlišování lidí v populaci po očkování, kdo je občanem 1. (očkované) kategorie (a kdo může si nakoupit v obchodě), a kdo je občanem 2. (neočkované) kategorie (a nesmí vstoupit do obchodu). Vakcína je tudíž záminkou pro zavedení Total Control.

The vaccine is only an excuse for introducing covid passports and systems for tracing and discerning between a vaccinated and a non-vaccinated person. The vaccine isn't the goal for your good and health, the vaccine is a means for media and political reasoning of the need of subsequent tracing, identifying and discerning people in the population after vaccination, who is the Category I (vaccinated) citizen (and who can buy goods in a shop) and who is Category II (unvaccinated) citizen (and cannot enter a shop). The vaccine is therefore an excuse for implementing Total Control.

Nemyslete si, že Světová banka jako vrcholný orgán světového sionistického bankovního kaganátu poskytuje rozvojovým zemím granty na COVID-19 do roku 2025 jen tak z plezíru a pro nic za nic. Oni vědí, že covidová krize bude trvat minimálně 5 let a během této doby zlikvidují góje, automobilový průmysl se spalovacími motory, dojde k vybudování 5G sítě v celé západní civilizaci, která bude použita ke sledování obyvatelstva a po těch 5 letech už bude hotovo. **Protože každý bude sledovaný ve svém 5G mobilu, každého bude možné dohledat a zavřít do izolace, pod záminkou, že přišel před XX hodinami do styku s nějakým nakaženým,** nebude proti tomu odvolání a po ulicích budou chodit covidová Gestapa a kontrolovat 5G mobilní telefony okoljdoucích, že mají covidovou povolenku na vycházku.

Don't make yourself believe that the World Bank as the supreme body of the world Zionist bank khaganate provides grants for COVID-19 until 2025 to the developing countries just like that and for nothing. They know that the covid crisis will last at min. 5 years and that during this time they will annihilate the goyim, the car industry with combustion engines, that 5G network, which will be used for tracing the population in the entire Western civilisation, will be built, and 5 years later, the plan will be accomplished. **Because everyone will be followed in their 5G phone, everyone will be traceable and it will be possible to isolate them based on the excuse that they were in contact with an infected person XX hours ago,** people will have no possibility of appeal and streets will be filled with covid Gestapo checking 5G phones of the passers-by for covid permit to take a walk.

 Ne v dobrých rukách, ale v těch nejlepších vyvolených rukách. Tak je to správně. Čest.

 Nejak se nam kluci sesli v te kovidove zalezitosti. Ze by ty protokoly preci jen nelhaly?!

The ones vaccinated against Covid-19 are in good hands...

Albert Bourla,
Pfizer director

Not in good hands but in the best chosen hands. That's the way it should be. Bye comrades

Khazarian messiah in good health

Funny how the guys met up in the covid matter. Perhaps the protocols were right after all?!

8. Premise: The vaccination works, Jews are vaccinating themselves as a priority, to annihilate non-Jew population; demonization of Israel.

UŽ víte co nás čeká v následujících týdnech, měsících? Toto by mělo být upozorněním pro VŠECHNY a vést lidi k zamyšlení PROČ nám najednou servírují tak často Izrael a PROČ všichni politici jezdí na kobereček právě do této země. No protože Izrael se stane novou světovou mocí !! O to tady jde. O předvedení jejich jednoty a vzoru pro ostatní země. Řízení světa je řízeno právě odtud. Proto si všichni do této země jezdí pro "rady a inspiraci".
PLÁN NOVÉHO SVĚTOVÉHO ŘÁDU POCHÁZÍ Z TĚTO SIONISTICKÉ ZEMĚ, KTERÁ BRZY PŘEDSTAVÍ ŽIDOVSKÉHO KRÁLE, KTERÝ BUDE VLÁDNOUT CELÉMU SVĚTU.

Do you know what's ahead of us in the coming weeks, months? This should be a warning for EVERYONE and make people think about WHY they are suddenly putting Israel on our plates and WHY all politicians are hauled over the coals and come to this country. Well, because Israel will become the new world power!! That's what it's about. About showing their unity and example to other countries. World government is governed just from right there. That's why everybody is going to this country to find "advice and inspiration".
THE PLAN OF THE NEW WORLD ORDER COMES FROM THIS ZIONIST COUNTRY, WHICH WILL SOON PRESENT A JEWISH KING, WHICH WILL RULE THE WHOLE WORLD.

Ginzburg
WHICH GROUP IS HEAVILY OVER-REPRESENTED IN VACCINE NEPOTISM?

- ☑ Pfizer's CEO is Jewish
- ☑ AstraZeneca's CEO was takeover as CEO of Israel's Teva Pharmaceuticals which means he is Jewish
- ☑ Moderna's vaccine was created by a Jew
- ☑ Johnson & Johnson's CEO is Jewish
- ☑ Teva is an Israel pharmaceutical company with a Jewish CEO
- ☑ Regeneron Pharmaceuticals CEO is Jewish
- ☑ Sputnik-V Gamaleya's (Russia) head of research, Alexander Ginzburg, is Jewish

*** Why is 0.2 % of the 7.89 billion humans battling 1000 in vaccine nepotism?

You can call it coincidence. You can call it whatever you want. It has to be investigated. At this very moment you are witnessing a real holocaust. You are the target.

ANTISEMITISM BETWEEN COVID-19 AND THE WAR IN UKRAINE

In the early months of 2022, the covid-19 pandemic began to significantly fade away and most countries around the world lifted blanket anti-epidemic measures. In direct proportion to the declining incidence of the disease, manifestations of anti-Jewish prejudicial hatred were disappearing from the global information space. On Thursday, 24 February 2022, the army of the Russian Federation annexed the sovereign territory of Ukraine. This act of military aggression was followed by a massive wave of anti-Jewish conspiracy theories that clearly identified the alleged culprits of the emerging crisis. The disinformation infrastructure that established itself globally during the pandemic in turn filled the vessel of the original covid-19 anti-semitism with new content and recycled all the anti-Jewish narratives that are the subject of this case study. The twists and turns of history and the crises keep changing, but the phenomenon of antisemitism persists.

Animalization, i.e. Jews are dehumanized and compared to insect or animals that are perceived as filthy, repulsive, insidious or parasitic.

CORONAVIRUS

The Jew is depicted as a serpent with its tail gripping the US Capitol (world domination), with syringes of coronavirus vaccine instead of teeth (responsibility for the pandemic), symbols of death and global ideologies (conspiracy) in a halo above his head, and a group of riot police standing to his left in front of a column with monitoring cameras (population control). Commentary *"The more doses, the more Israel!"* identifies Jews with the State of Israel (demonization of Israel).

Mendacious, demonizing and stereotypical claims about the collective power of the Jews and the myth of a worldwide Jewish conspiracy.

CORONAVIRUS

The Jew is depicted as a driver clutching the UN logo instead of the steering wheel, the gearshift head is a coronavirus (responsibility for the pandemic, world domination).

The new antisemitism and demonization of Israel, i.e. the use of stereotypical anti-Jewish symbols and statements to describe the State of Israel, which represents the “collective” Jew.

CORONAVIRUS

The virus is identified with the State of Israel, which is responsible for the pandemic (global conspiracy).

RUSSIAN-UKRAINIAN CONFLICT

The State of Israel is portrayed as a puppet master that manipulates Russia and Ukraine and is responsible for the war conflict (global conspiracy).
